Working Note:**1. Calculation of Goodwill**

Calculation of Profit through simple average method since profit of the previous years has no trend.

| Year | Profit |
|---------|-----------------|
| 2020-21 | 1,15,000 |
| 2021-22 | 1,25,000 |
| 2022-23 | 1,40,000 |
| 2023-24 | <u>1,20,000</u> |
| | <u>5,00,000</u> |

Average profit $(5,00,000/4) = 1,25,000$

Goodwill (3 years purchase) = $3 \times 1,25,000 = ₹ 3,75,000$

2. Calculation for adjustment of Amount of Goodwill

| Partners | Old Share | New Share | Gain /(loss) |
|----------|---------------|---------------|-----------------|
| Amal | $\frac{1}{3}$ | – | $(\frac{1}{3})$ |
| Bimal | $\frac{1}{3}$ | $\frac{3}{5}$ | $\frac{4}{15}$ |
| Kamal | $\frac{1}{3}$ | $\frac{2}{5}$ | $\frac{1}{15}$ |

Amal's share = $1/3$ rd of 3,75,000 = ₹1,25,000

Amal's share of goodwill distributed among the remaining partners in sacrificing ratio i.e., 4:1

Bimal's share = $1,25,000 \times 4/5 = ₹1,00,000$

Kamal's share = $1,25,000 \times 1/5 = ₹ 25,000$

(b) Measurement is vital aspect of accounting. Primarily transactions and events are measured in terms of money. Any measurement discipline deals with three basic elements of measurement i.e.

- (1) Identification of objects and events to be measured;
- (2) Selection of standard or scale to be used;
- (3) Evaluation of dimension of measurement standard or scale.

There are four generally accepted measurement bases or valuation principles. These are:

- (i) **Historical Cost:** It means acquisition price. According to this base, assets are recorded at an amount of cash or cash equivalent paid at the time of acquisition. Liabilities are recorded at the time of proceeds received in exchange for the obligation.
- (ii) **Current Cost:** Assets are carried out at the amount of cash or cash equivalent that would have to be paid if the same or an equivalent asset was acquired currently. Liabilities are carried at the undiscounted amount of cash or cash equivalents that would be required to settle the obligation currently.
- (iii) **Realizable Value:** As per realisable value, assets are carried at the amount of cash or cash equivalents that could currently be obtained by selling the assets in an orderly disposal and Liabilities are carried at their settlement values. Liabilities are carried out at settlement values.
- (iv) **Present Value:** As per present value, an asset is carried at the present discounted value of the future net cash inflows that the item is expected to generate in the normal course of business. Liabilities are carried at the present discounted value of future net cash outflows that are expected to be required to settle the liabilities in the normal course of business.
