Directions (Q. 86-95): Read the passage given below and answer the questions that follow based on the information given in the passage.

IN GORILLA society, power belongs to silverback males. These splendid creatures have numerous status markers besides their back hair: they are bigger than the rest of their band, strike space-filling postures, produce deeper sounds, thump their chests lustily and, in general, exude an air of physical fitness. Things are not that different in the corporate world. The typical chief executive is more than six feet tall, has a deep voice, a good posture, a touch of grey in his thick, lustrous hair and, for his age, a fit body. Bosses spread themselves out behind their large desks. They stand tall when talking to subordinates. Their conversation is laden with prestige pauses and declarative statements. The big difference between gorillas and humans is, of course, that human society changes rapidly. The past few decades have seen a striking change in the

distribution of power—between men and women, the West and the emerging world and geeks and non-geeks. Women run some of America's largest firms, such as General Motors (Mary Barra) and IBM (Virginia Rometty). More than half of the world's biggest 2,500 public companies have their headquarters outside the West. Geeks barely out of short trousers run some of the world's most dynamic businesses. Peter Thiel, one of Silicon Valley's leading investors, has introduced a blanket rule: never invest in a CEO who wears a suit. Yet it is remarkable, in this supposed age of diversity, how many bosses still conform to the stereotype. First, they are tall: in research for his 2005 book, "Blink", Malcolm Gladwell found that 30% of CEOs of *Fortune* 500 companies are 6 feet 2 inches or taller, compared with 3.9% of the American population. People who "sound right" also have a marked advantage in the race for the top. Quantified Communications, a Texas-based company, asked people to evaluate speeches delivered by 120 executives. They found that voice quality accounted for 23% of listeners' evaluations and the content of the speech only accounted for 11%. Academics from the business schools of the University of California, San Diego and Duke University listened to 792 male CEOs giving presentations to investors and found that those with the deepest voices earned \$187,000 a year more than the average.

Physical fitness seems to matter too: a study published this month, by Peter Limbach of the Karlsruhe Institute of Technology and Florian Sonnenburg of the University of Cologne, found that companies in America's S&P 1500 index whose CEOs had finished a marathon were worth 5% more on average than those whose bosses had not. Good posture makes people act like leaders as well as look like them: Amy Cuddy of Harvard Business School notes that the very act of standing tall, with your feet planted solidly and somewhat apart, your chest out and your shoulders back, boosts the supply of testosterone to the blood and lowers the supply of cortisol, a steroid associated with stress. (Unfortunately, this also increases the chance that you will make a risky bet.) Besides relying on all these supposedly positive indicators of fitness to lead, those who choose bosses also rely on some negative stereotypes. Overweight people—women especially—are judged incapable of controlling themselves, let alone others. Those who "uptalk"—habitually ending their statements on a high note as if asking a question—rule themselves out on the grounds that they sound tentative and juvenile.

 56. (2) Let shyam's Contribution = 'x' Rs.
 \therefore Ratio of their investment in 4 years
 $= 6500 \times 4 \times 12 : X \times 40$
 $13 : 12 = 7800 : X$
 $\therefore x = \frac{12}{13} \times 7800 = 7200$ Rs.
 57. (3) Total distance = Resultant velocity \times Time
 $= (20 + 4) \times \frac{30}{60} = 24 \times \frac{1}{2} = 12$ km.
 58. S. I after 20 years = $\frac{2000 \times 20 \times 10}{100} = 4000$
 \therefore New principle = $2000 + 4000 = 6000$
 Now, Let after 't' years the amount become
 $14000 - 6000 = 8000$
 $8000 = \frac{6000 \times T \times 10}{100}$
 \therefore Time t = $\frac{8000 \times 100}{6000 \times 10} = \frac{40}{3}$ years.
 \therefore Total time = $20 + \frac{40}{3} = \frac{100}{3} = 33\frac{1}{3}$ years
 59. (1) Total distance = $128 + 122 = 250$ meter
 And Resultant Velocity = $48 + 42 = 90$ km
 $= 90 \times \frac{5}{18} = 25$ m/s.
 \therefore Time to cross each other = $\frac{250}{25} = 10$ Second
 60. (2) Let speed of boat be 'v' and, of stream be 'x'
 For downstream, $V + U = \frac{28}{7} = 4$ km/hr — (I)
 & for ups stream, $V - U = \frac{28}{14} = 2$ km/hr — (II)
 From (I) & (II),
 $V = 3$ km/hr.
 61. (3) Let cost price be = 'x' Rs.
 \therefore S.P = $X \times \frac{116}{100} \times \frac{125}{100} = \frac{29x}{20}$
 \therefore Profit % = $\frac{\frac{29x}{20} - x}{x} \times 100$
 $= \frac{9x}{20x} \times 100 = 45\%$
 62. (5); Interest on Rs. 2410 for 1 year = $2651 - 2410 = 241$
 \therefore Rate = $\frac{100 \times 241}{2410} = 10\%$ P.A.
 Let the sum be x.
 \therefore Amount in 3 years = $x \times (1 + \frac{10}{100})^3 = 2410$
 $\therefore x = 2410 \times \frac{10}{11} \times \frac{10}{11} \times \frac{10}{11} = \text{Rs. } 1811$
 63. (4); Average speed = $\frac{2xy}{x+y} = \frac{2 \times 60 \times 45}{60+45} = 51.42$ kmph
 64. (4); Speed of trains = $\frac{120}{8} = 15$ m/sec
 and $\frac{90}{6} = 15$ m/sec
 \therefore Relative speed = $15 + 15 = 30$ m/sec
 \therefore Time = $\frac{120+90}{30} = \frac{210}{30} = 7$ seconds
 65. (2); Let the required distance be x km.
 $\therefore \frac{x}{50} - \frac{x}{60} = 7$
 $\Rightarrow \frac{6x - 5x}{300} = 7$
 $\therefore x = 300 \times 7 = 2100$ km
 66. (1) time taken by both together = 3 hours
 67. (4) Let the original price be Rs 100.
 So he bought it at 10% discount i.e. Rs 90 and sells
 it at 35% more than the original rate i.e. Rs 135.
 Actual profit is $135 - 90 = \text{Rs } 45$
 \therefore % profit = $\frac{45}{90} \times 100 = 50\%$

REASONING APTITUDE

Eight friends P, Q, R, S, T, V, W and Y are sitting around a square table in such a way that four of them sit at four corners of the square while four sit in the middle of each of the four sides. The ones who sit at the four corners faces the centre while those who sit in the middle of the sides face outside. S sits third to the right of P. P faces the centre. Y is not an immediate neighbor of P or S. T sits third to the right of R. R does not sit in the middle of any of the sides and also R is not an immediate neighbor of Y. Only one person sits between P and V. Q is not an immediate neighbor of V.

1. If all the persons are made to sit in alphabetical order in clockwise direction, starting from P, the positions of how many (excluding P) will remain unchanged as compared to their original seating positions?

- A) None B) One C) Two
D) Three E) Four

2. Which of the following is true regarding Y?

- A) T is not immediate neighbor of Y
B) Y sits in the middle of one of the sides
C) R sits second to left of Y
D) P and V are immediate neighbors of Y
E) None is true

3. Who amongst the following sits fourth to the left of V?

- A) Y B) R C) T
D) Q E) W

4. What is the position of Q with respect to R?

- A) Immediately to the left
B) Second to the left
C) Third to the left
D) Third to the right
E) Immediately to the right

5. Four of the following five are alike in a certain way and so form a group. Which is the one that does not belong to the group?

- A) T B) W C) V
D) S E) Q

Directions (6-10): Study the information carefully and answer the following questions:

A building has eight floors from 1 to 8 in such a way that ground floor is numbered 1, the above floor is numbered 2 and so on. The top most floor is numbered 8. Eight persons G, P, M, R, Q, A, D and C are staying each on one of these floors. A is staying on floor 6. There is a gap of three persons between G and R. C is staying on the topmost floor. Neither P nor M is staying on the floor 5. Q is staying middle of P and M. R is staying on the floor 1. M is not an immediate neighbor of G.

6. Who is staying on the floor no. 7?

- 1) A 2) P 3) D
4) R 5) M

7. How many persons are staying between D and P?

- 1) Three 2) Four 3) Two

4) One 5) None of these

8. Who is staying on the second floor?

- 1) Q 2) M 3) P
4) A 5) Q or M

9. If all persons are arranged in alphabetical order such as A occupies floor 1 then who will occupy floor 5?

- 1) G 2) Q 3) R
4) M 5) P

10. Immediate neighbors of the person who is staying in floor 3?

- 1) R and P 2) A and P 3) G and M
4) P and M 5) D and G

Directions (11-15) Study the following information to answer the questions.

Twelve people are sitting in two parallel rows containing 6 people each, in such a way that there is an equal distance between adjacent persons. In row-1 P, Q, R, S, T, and U are seated and all of them are facing south. In row-2 A, B, C, D, E and F are seated and all facing North. Therefore in the given seating arrangement each member seated in a row faces another member of the outer row.

S sits third to right of Q, either S or Q sits an extreme end of line. The one who faces Q sits second to right of E. Two people sits between B and F. Neither B nor F sits at an extreme end of the line. The immediate end of line. The immediate neighbour of B faces the person who sits third to left of P, R and T are immediate neighbours of the each other. C sits second to the left of A. T does not face the immediate neighbour of D.

11. Who amongst the following sits at the extreme ends of the rows?

- (a) S, D (b) Q, A (c) U, F
(d) Q, E (e) P, D

12. Who amongst the following faces S?

- (a) A (b) B (c) C
(d) D (e) F.

13. How many persons are seated between U and R?

- (a) One (b) Two (c) Three
(d) Four (e) None.

14. Which of the following is true regarding T?

- (a) F faces T
(b) U is an immediate neighbour of T
(c) F faces the one who is second to right of T
(d) T sits at one of the extreme ends of the line
(e) Q sits second to the right of T.

15. Four of the following five are alike in a certain way based on the given arrangement & so form a group which is the one that does not belong to that group?

- (a) A-T (b) B-T
(c) F-P (d) C-U
(e) E-Q.

Directions (26-30): Study the following arrangement carefully and answer the questions given below—
1 R Z T 4 A 9 \$ D F 1 U # B # 8 H I © X M H 3 2 P \$ 5 N P 6 D

16. How many such consonants are there in the above arrangement, each of which is immediately preceded by a consonant and immediately followed by a number?

- (1) None (2) One (3) Two
(4) Three (5) More than three

17. How many such numbers are there in the above arrangement, each of which is immediately preceded by a letter but not immediately followed by a symbol?

- (1) None (2) One (3) Two

Instructions (30-34) : In each of the questions given below, one question and below it two statements I and II are given. You have to determine whether the data given in the statements is sufficient to answer the question or not.

Answer (1) if the data given in statement I is sufficient to answer the question whereas data given only in statement II is not sufficient to answer the question.

Answer (2) if the data given only in statement II is sufficient to answer the question whereas data given

only in statement I is not sufficient to answer the question.

Answer (3) if the data given either only in statement I or only in statement II is sufficient to answer the question.

Answer (4) if the combined data given in statement I and statement II are not sufficient to answer the question.

Answer (5) if the combined data given in statement I and statement II are necessary to answer the question.

36. In which month of the year did the construction of the building begin?

I. The construction engineer correctly remembers that the construction began before September but after May and that particular month did not have 31 days.

II. The builder correctly remembers that the construction began after February but before October and the fact that, that particular month did not have 31 days.

37. Each of A, B, C, D and E are of different heights. Who is the third tallest among these ?

I. E is only shorter than B.

II. C is only taller than A.

38. How many sisters does K have?

I. M is sister of K.

II. Mother of K has three children.

39. In a row of thirty students facing north, what is the position of R from left end?

I. There are twelve students between R and Q.

II. T is tenth from right and there are sixteen students between T and R.

40. How is 'go' written in a code language?

I. In that code language 'go over there' is written as 'pa da na'

II. In that code language 'go and sit' is written as 'sa ka pa'.
