Illustration 1

Due to inadequacy of profits during the year ended 31st March, 20X2, XYZ Ltd. proposes to declare 10% dividend out of general reserves. From the following particulars, ascertain the amount that can be utilised from general reserves, according to the Companies (Declaration of dividend out of Reserves) Rules, 2014:

	Rs.
17,500 9% Preference shares of Rs.100 each, fully paid up	17,50,000
8,00,000 Equity shares of Rs.10 each, fully paid up	80,00,000
General Reserves as on 1.4.20X1	25,00,000
Capital Reserves as on 1.4.20X1	3,00,000
Revaluation Reserves as on 1.4.20X1	3,50,000
Net profit for the year ended 31 st March, 20X2	3,00,000
Average rate of dividend during the last three years has been 12%.	

(MTP Sept 24 S2 4M)

Solution:

Amount that can be drawn from reserves for 10% dividend		
10% dividend on Rs.80,00,000		Rs.8,00,000
Profits available		
Current year profit	3,00,000	
Less: Preference dividend	<u>(1,57,500)</u>	<u>(1,42,500)</u>
Amount which can be utilised from reserves		<u>6,57,500</u>

Conditions as per Companies (Declaration of dividend out of Reserves) Rules, 20X1:

Condition I

Since 10% is lower than the average rate of dividend (12%), 10% dividend can be declared.

Condition II

Maximum amount that can be drawn from the accumulated profits and reserves should not exceed 10% of paid up capital plus free reserves ie. Rs.12,25,000 [10% of (80,00,000+17,50,000+25,00,000)]

Condition III

The balance of reserves after drawl Rs.18,42,500 (Rs.25,00,000 - Rs.6,57,500) should not fall below 15 % of its paid up capital ie. Rs.14,62,500 (15% of Rs.97,50,000]

Since all the three conditions are satisfied, the company can withdraw Rs.6,57,500 from accumulated reserves (as per Declaration and Payment of Dividend Rules, 2014.)

Question 7: Following information are available in respect of Z Limited as on 31st March, 2024

1. Equity shares of Rs. 100 each Rs. 500 lakhs
2. General Reserve Rs. 100 lakhs
3. Loss for the year ending 31st March, 2024 Rs. 5 lakhs

Due to absence of profits during the year 2023-24, the management recommends to declare dividend of 10% on equity share capital out of general reserve.

The rates of equity dividend for the last 5 years immediately preceding the year 2023-24 are as follows:

2022-23	2021-22	2020-21	2019-20	2018-19
12%	14%	10%	10%	7%

As an accountant of the company, you are required to suggest whether the recommendation of the management is justified? If, you do not agree, then suggest the rate of dividend.

(PYP May 24 4M)

Answer:

In case of declaration of dividend out of free reserves, there are 3 conditions:

- (1) Dividend Rate < Average Rate of last 3 years

$$10\% < 12\% [(12+14+10)/3]$$

Condition is Satisfied

- (2) Dividend Distributed < 10% of PUSC + Reserve and Surplus

$$50,00,000 < 59,50,000 [(5,00,00,000 + 1,00,00,000 - 5,00,000) \times 10\%]$$

Condition is Satisfied

- (3) Reserves after dividend > 15% of PUSC 45,00,000 not > 75,00,000 (5,00,00,000 × 15%)

Condition is Not Satisfied

- (4) The closing balance of reserves after payment of dividend and set off of loss = Rs. 75,00,000

$$\text{Therefore, can be utilized} = 20,00,000 (1,00,00,000 - 5,00,000 - 75,00,000)$$

$$\text{Thus, rate of dividend} = (20,00,000/5,00,00,000) = 4\%$$

Alternatively

To judge the recommendation of management, the satisfaction of all three conditions is to be checked:

- (1) Condition I

The proposed dividend of 10% is less than the average rate of dividend being 12%

$$(i.e.) (12+14+10) / 5 = 12\%$$

Hence, this condition is satisfied.

- (2) Condition II

Amount to be withdrawn.

10% dividend on Equity share capital	50,00,000
+ Loss of Current year	5,00,000
Amount to be drawn from General Reserve	55,00,000

Maximum amount that can be withdrawn should not exceed 10% of paid-up share capital + free reserves.

$$= 10\% \text{ of } [\text{Rs. 500 lakhs} + \text{Rs. 100 lakhs}] = \text{Rs. 60,00,000}$$

As the amount to be withdrawn is within the maximum limit, hence, this condition is also satisfied.

- (3) Condition III

Balance of reserves after withdrawal (100-55) Rs. 45,00,000

15% of paid-up capital Rs. 75,00,000

As the balance of reserves should not be less than 15% of its paid-up share capital, but here the balance of reserves after withdrawal is less than 15% of paid-up share capital, hence this condition is

not satisfied, hence, 10% dividend cannot be declared.

Maximum withdrawal of Reserve if condition II is satisfied.

Opening balance of Reserves in the beginning = Rs. 1,00,00,000 of the year

- Closing balance of reserves being 15% of = Rs. 75,00,000 paid-up capital

Reserves available = Rs. 25,00,000

Maximum permissible Divisible Profits

Permissible withdrawal as above = Rs. 25,00,000

Less: Current Year's Loss = Rs. 5,00,000

Maximum permissible Divisible profit = Rs. 20,00,000

Actual permissible rate of Dividend =

$(Rs. 20,00,000 / Rs. 5,00,00,000) \times 100 = 4\%$

Therefore, the recommendation of management is not justified and a dividend only up to a rate of 4% can be declared.

Discount on reissue of shares = ₹ 2,250

Amount to be transferred to capital reserve = ₹ 5,250 - ₹ 2,250 = ₹ 3,000

Note:

- The final dividend will not be recognized as a liability at the balance sheet date (even if it is declared after reporting date but before approval of the financial statements) as per Accounting Standards. Hence, it has not been recognized in the financial statements for the year ended 31 March, 2025. Such dividends will be disclosed in notes only.
- There is a Contingent Liability for bills discounted but not yet matured amounting to ₹ 15,000

Question 10: Due to inadequacy of profits during the year ended 31st March, 2025, DAY Ltd proposes to declare 9% dividend out of General reserves.

From the following particulars, ascertain the amount that can be utilized from the General reserves according to the Companies (Declaration of dividend) rules, 2014.

	₹
9,50,000, Equity Shares of ₹ 10 each fully paid up	95,00,000
General reserves as on 1st April, 2024	18,50,000
Revaluation Reserve as on 1st April, 2024	4,25,000
Net profit for the year ended 31st March, 2025	3,75,000
Average rate of dividend during the last 3 years has been	12.5%

(PYP May 25 4M)

Answer:

Amount that can be drawn from reserves for 9% dividend	
9% dividend on ₹ 95,00,000	₹ 8,55,000
Profits available	
Current year profit	(3,75,000)
Amount which can be utilised from reserves	4,80,000

Conditions as per Companies (Declaration of dividend out of Reserves) Rules, 2014:

Condition I

Since 9% is lower than the average rate of dividend (12.5%), 9% dividend can be declared.

Thus, this condition is satisfied.

Condition II

Maximum amount that can be drawn from the accumulated profits and reserves should not exceed 10% of paid up capital plus free reserves i.e. ₹ 11,35,000 [10% of (95,00,000+18,50,000)].

Thus, this condition too is satisfied.

**Condition III**

The balance of reserves after drawl ₹ 13,70,000 (₹ 18,50,000 - ₹ 4,80,000) should not fall below 15% of its paid up capital i.e. ₹ 14,25,000 (15% of ₹ 95,00,000]

Thus, this condition is not satisfied, the company cannot withdraw ₹ 4,80,000 from accumulated reserves.

Conclusion:

Since condition-III is not satisfied, the Day Ltd cannot declare dividend @ 9%. However, all three conditions to be satisfied, Day Ltd. can MAXIMUM utilize ₹ 4,25,000 and pay dividend to that extent.

Theoretical Questions

11. What is the significance of cash flow statement? Explain in brief.

Answer:

Cash flow statement provides information about the changes in cash and cash equivalents of an enterprise. It identifies cash generated from trading operations and is very useful tool of planning.

12. Explain the difference between direct and indirect methods of reporting cash flows from operating activities with reference to AS 3.

Answer:

As per Para 18 of AS 3 (Revised) on Cash Flow Statements, an enterprise should report cash flows from operating activities using either:

- (a) The direct method, whereby major classes of gross cash receipts and gross cash payments are disclosed; or
- (b) the indirect method, whereby net profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows.

13. What are the main features of the Cash Flow Statement?

Answer:

According to AS 3 on "Cash Flow Statement", cash flow statement deals with the provision of information about the historical changes in cash and cash equivalents of an enterprise during the given period from operating, investing and financing activities. Cash flows from operating activities can be reported using either (a) the direct method, or (b) the indirect method. A cash flow statement when used in conjunction with the other financial statements, provides information that enables users to evaluate the changes in net assets of an enterprise, its financial structure (including its liquidity and solvency), and its ability to affect the amount and timing of cash flows in order to adapt to changing circumstances and opportunities.

14. Mayuri Ltd. acquired Plant and Machinery for Rs. 25 lakhs. During the same year it also sold Furniture and Fixtures for Rs. 4 lakhs. Can the company disclose Net Cash Outflow towards purchase of Fixed Assets Rs. 21 lakhs (i.e. 25 lakhs - 4 lakhs) in the Cash Flow Statement?

Answer:

As per AS 3, Cash Flow Statements, an enterprise should report separately major classes of gross cash receipts and gross cash payments arising from investing and financing activities, except in the case of:

- cash receipts and payments on behalf of customers when the cash flows reflect the activities of the customer rather than those of the enterprise; and
- cash receipts and payments for items in which the turnover is quick, the amounts are large, and the maturities are short.

In the given case, since the purchase of Plant and Machinery and disposal of Furniture and Fixtures do not fall in the criteria of exception mentioned above, the same should be presented on a gross basis as an outflow of Rs. 25 lakhs and an inflow of Rs. 4 lakhs. Presentation of net cash outflow of Rs. 21 lakhs is not permitted as per AS 3.

24. From the following information of XYZ Limited, calculate cash and cash equivalent as on 31.03.20X2 as per AS 3.

Particulars	Amount (Rs.)
Balance as per the Bank Statement	25,000
Cheque issued but not presented in the Bank	15,000
Short Term Investment in liquid equity shares of ABC Limited	50,000
Fixed Deposit created on 01-11-20X1 and maturing on 15-04-20X2	75,000

Bank Balance in a Foreign Currency Account in India (Conversion Rate: On the day of deposit Rs. 69/USD as on 31-03-20X2 Rs. 70/USD)	\$ 1,000

Answer:

Computation of Cash and Cash Equivalents as on 31st March, 20X2

	Rs.
Cash balance with bank (Rs.25,000 less Rs.15,000)	10,000
Short term investment in highly liquid sovereign debt mutual fund on 1.3.20X2	1,00,000
Bank balance in foreign currency account (\$1,000 x Rs.70)	70,000
	1,80,000

Note: Short term investment in liquid equity shares and fixed deposit will not be considered as cash and cash equivalents.

25. Z Ltd. has no Foreign Currency Cash Flow during the reporting period. It held a deposit in a bank in France. The balances as at the beginning of the year and at the end of the year were € 100,000 and € 105,000 respectively. The exchange rate at the beginning of the year was € 1 = Rs. 82, and at the end of the year was € 1 = Rs. 85. The increase in the deposit balance of € 5,000 was on account of interest credited on the last day of the reporting period. The deposit was reported at Rs. 82,00,000 in the opening balance sheet and at Rs. 89,25,000 in the closing balance sheet. You are required to show how these transactions would be presented in the Cash Flow Statement as per AS 3.

Answer:

The Statement of Profit and Loss was credited on account of:

Interest Income: € 5,000 x Rs. 85 = Rs. 4,25,000

Exchange difference = € 100,000 x (Rs. 85 - Rs. 82) = Rs. 3,00,000

In preparing the Cash Flow Statement, the exchange difference of Rs. 3,00,000 should be deducted from the Net Profit before taxes, since it is a non-cash item. However, in order to reconcile the opening balance of the Cash and Cash Equivalents with its closing balance, the Exchange Difference of Rs. 3,00,000 should be added to the opening balance in a Note to the Cash Flow Statement.,

Cash Flows arising from transactions in a Foreign Currency shall be recorded in Z Ltd.'s reporting currency by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the cash flow.

You are required to compute by Debt Equity Ratio Test, the maximum number of shares that can be bought back in the light of above information, when the offer price for buy-back is Rs.30 per share.

Solution:

	Particulars	Rs.
(a)	Loan funds	42,00,000

(e)	Maximum permitted buy-back of Equity (Rs.in crores) [(d) - (b)] (See Note 2)	38,85,000 (by simultaneous equation)
(f)	Maximum number of shares that can be bought back @ Rs.30 per share (shares in crores) (See Note 2)	1,29,500 (by simultaneous equation)

Working Note:

	<u>72,80,000</u>

2. As per section 68 of the Companies Act, 2013, amount transferred to CRR and maximum equity to be bought back will be calculated by simultaneous equation method.

Suppose amount equivalent to nominal value of bought back shares transferred to CRR account is 'x' and maximum permitted buy-back of equity is 'y'.

Equation 1 : (Present equity - Nominal value of buy-back transfer to CRR) - Minimum equity to be maintained = Maximum permissible buy-back of equity.

$$(72,80,000 - x) - 21,00,000 = y \quad (1)$$

$$\text{Since } 51,80,000 - x = y$$

$$\text{Equation 2: } \left(\frac{\text{Maximum buy back}}{\text{Offer price for buy back}} \times \text{Nominal Value} \right)$$

= Nominal value of the shares bought -back to be transferred to CRR

$$= \left(\frac{y}{30} \times 10 \right) = x$$

$$3x = y \quad (2)$$

$$x = \text{Rs.}12,95,000 \text{ crores and } y = \text{Rs.}38,85,000 \text{ crores}$$

Perrotte Ltd. (a non-listed company) has the following Capital Structure as on 31.03.20X1:

(1)	Equity Share Capital (Shares of Rs.10 each fully paid)	-	330

	Securities Premium Account	90	-
	Profit & Loss Account	90	-
	Infrastructure Development Reserve	<u>180</u>	<u>600</u>
(3)	Loan Funds		1,800

The Shareholders of Perrotte Ltd., on the recommendation of their Board of Directors, have approved on 12.09.20X1 a proposal to buy-back the maximum permissible number of Equity shares considering the large surplus funds available at the disposal of the company.

The prevailing market value of the company's shares is Rs.25 per share and in order to induce the existing shareholders to offer their shares for buy-back, it was decided to offer a price of 20% over market.

You are also informed that the Infrastructure Development Reserve is created to satisfy Income-tax Act requirements.

You are required to compute the maximum number of shares that can be bought back in the light of the above information and also under a situation where the loan funds of the company were either Rs.1,200 crores or Rs.1,500 crores.

Assuming that the entire buy-back is completed by 09.12.20X1, show the accounting entries in the company's books in each situation. (PYP Sept 24 7M)

(f)	Maximum number of shares that can be bought back @ Rs.30 per share (shares in crores) (See Note 2)	Nil	3.75 (by simultaneous equation)	Nil

Note:

- Under Situations 1 & 3 the company does not qualify for buy-back of shares as per the provisions of the Companies Act, 2013.
- As per section 68 of the Companies Act, 2013, the ratio of debt owed by the company should not be more than twice the capital and its free reserve after such buy-back. In the question, it is stated that the company has surplus funds to dispose of therefore, it is presumed that buy-back is out of free reserves or securities premium and hence a sum equal to the nominal value of the share bought back shall be transferred to Capital Redemption Reserve (CRR). Utilization of CRR is restricted to issuance of fully paid-up bonus shares only. It means CRR is not available for distribution as dividend. Hence, CRR is not a free reserve. Therefore, for calculation of future equity i.e. share capital and free reserves, amount transferred to CRR on buy-back has to be excluded from present equity.

Amount transferred to CRR and maximum equity to be bought back will be calculated by simultaneous equation method.

Suppose amount equivalent to nominal value of bought back shares transferred to CRR account is 'x' and maximum permitted buy-back of equity is 'y'.

Then

Equation 1: (Present equity - Nominal value of buy-back transfer to CRR) - Minimum equity to be maintained = Maximum permissible buy-back of equity

$$(750 - x) - 600 = y$$

(1)

Since $150 - x = y$

$$\text{Equation 2: } \left(\frac{\text{Maximum buy back}}{\text{Offer price for buy back}} \times \text{Nominal Value} \right)$$

= Nominal value of the shares bought -back to be transferred to CRR

$$= \left(\frac{y}{30} \times 10 \right) = x$$

[here $(30 = 25\% \times 120)$]

$$\text{Or } 3x = y$$

(2)

by solving the above two equations we get

$$x = \text{Rs.37.5 crores}$$

$$y = \text{Rs.112.5 crores}$$

4. Amount transferred to CRR and maximum equity to be bought back will be calculated by simultaneous equation method

Suppose amount transferred to CRR account is 'x' and maximum permitted buy-back of equity is 'y' Then

Equation 1: (Present Equity - Transfer to CRR)- Minimum Equity to be maintained = Maximum Permitted Buy-Back

$$= (2,880 - x) - 1,600 = y$$

$$= 1280 - x = y$$

(1)

Equation 2: Maximum Permitted Buy-Back X Nominal Value Per Share/Offer Price Per Share

$$y/30 \times 10 = x \text{ or}$$

$$3x = y$$

(2)

by solving the above two equations we get $x = \text{Rs.}320$

$$y = \text{Rs.}960$$

Answer:

Determination of maximum no. of shares that can be bought back as per the Companies Act, 2013

1. Shares Outstanding Test

Particulars	(Shares)
Number of shares outstanding	1,70,000
25% of the shares outstanding	42,500

2. Resources Test: Maximum permitted limit 25% of Equity paid up capital + Free Reserves

Particulars	
Paid up capital (₹)	17,00,000
Free reserves (₹) (23,50,000 + 2,50,000 + 2,00,000)	28,00,000
Shareholders' funds (₹)	45,00,000
25% of Shareholders fund (₹)	11,25,000
Buy back price per share	₹ 30
Number of shares that can be bought back (shares)	37,500
Actual Number of shares proposed for buy back	35,000

3. Debt Equity Ratio Test: Loans cannot be in excess of twice the Equity Shareholder's Funds post Buy Back

	Particulars	₹
(a)	Loan funds (₹) (38,00,000+8,50,000)	46,50,000
(b)	Minimum equity to be maintained after buy back in the ratio of 2:1 (₹) (a/2)	23,25,000
(c)	Present equity/shareholders fund (₹)	45,00,000
(d)	Future equity/shareholders fund (₹) (see W:N;) (45,00,000 - 5,43,750)	39,56,250
(e)	Maximum permitted buy back of Equity (₹) [(d) - (b)]	16,31,250
(f)	Maximum number of shares that can be bought back @ ₹ 30 per share	54,375 shares
(g)	Actual Buy Back Proposed	35,000 Shares

Summary statement determining the maximum number of shares to be bought back

Particulars	Number of shares
Shares Outstanding Test	42,500
Resources Test	37,500
Debt Equity Ratio Test	54,375
Maximum number of shares that can be bought back [least of the above]	37,500

Company qualifies all tests for buy-back of shares and it can buy back maximum 37,500 shares on 1st April, 2022.

However, company wants to buy-back only 35,000 equity shares @ ₹ 30; Therefore, buy-back of 35,000 shares, as desired by the company is within the provisions of the Companies Act, 2013.

Working Note:

Amount transferred to CRR and maximum equity to be bought back will be calculated by simultaneous equation method.

Suppose amount transferred to CRR account is 'x' and maximum permitted buy-back of equity is 'y':

Then

$$(45,00,000 - x) - 23,25,000 = y \quad (1)$$

$$\left(\frac{y}{30} \times 10\right) = x \text{ Or } 3x = y \quad (2)$$

by solving the above equation, we get

$$x = ₹ 5,43,750$$

$$y = ₹ 16,31,250$$

Question 4: Quick Ltd. has the following capital structure as on 31st March, 2021:

		₹ in Crores

(3)	Loan Funds:

	Unsecured	320	2,520

On the recommendations of the Board of Directors, on 16th September, 2021, the shareholders of the company have approved a proposal to buy-back of equity shares. The prevailing market value of the company's share is ₹ 20 per share and in order to induce the existing shareholders to offer their shares for buy-back, it was decided to offer a price of 50% over market value. The company had sufficient balance in its bank account for the buy-back of shares.

You are required to compute the maximum number of shares that can be bought back in the light of the above information and also under a situation where the loan funds of the company were either ₹ 1,680 Crores or ₹ 2,100 Crores;

Assuming that the entire buy-back is completed by 31st December, 2021, Pass the necessary accounting entries (narrations not required) in the books of the company in each situation (PYP May'22)

3. Debt Equity Ratio Test

	Particulars	When loan fund is		
		₹ 2,520 crores	₹ 1,680 crores	₹ 2,100 crores
(a)	Loan funds (₹ in crores)	2,520	1,680	2,100

(d)	Future equity shareholder fund (₹ in crores) (See Note 2)	N.A.	997.5 (1,050-52.5)	N.A.
(e)	Maximum permitted buy-back of Equity (₹ in crores) [(d) - (b)] (See Note 2)	Nil	157.5 (by simultaneous equation)	Nil
(f)	Maximum number of shares that can be bought back @ ₹ 30 per share (shares in crores) (See Note 2)	Nil	5.25 (by simultaneous equation)	Nil

Note:

- Under Situations 1 & 3 the company does not qualify for buy-back of shares as per the provisions of the Companies Act, 2013.
- As per section 68 of the Companies Act, 2013, the ratio of debt owed by the company should not be

more than twice the capital and its free reserve after such buy-back.

Amount transferred to CRR and maximum equity to be bought back will be calculated by simultaneous equation method.

Suppose amount equivalent to nominal value of bought back shares transferred to CRR account is 'x' and maximum permitted buy-back of equity is 'y';

Then

Equation 1: (Present equity - Nominal value of buy-back transfer to CRR) - Minimum equity to be maintained = Maximum permissible buy-back of equity

$$(1,050 - x) - 840 = y$$

$$\text{Since } 210 - x = y$$

Maximum buy-back

$$\text{Equation 2} = \left(\frac{\text{Maximum buy back}}{\text{Offer for buy back}} \times \text{Nominal value} \right)$$

= Nominal value of the shares bought -back to be transferred to CRR

$$\left(\frac{y}{30} \times 10 \right)$$

$$\text{Or } 3x = y \quad (2)$$

by solving the above two equations we get

$$x = ₹ 52.5 \text{ crores } y = ₹ 157.5 \text{ crores}$$

- Statutory reserves, capital redemption reserve and plant revaluation reserves are not free reserves.
- For calculation of debt -equity ratio both secured and unsecured loans have been considered.

Question 6: Alpha Chemicals Ltd., a listed company, proposes a buy-back of 12% of its equity share capital from its free reserves under Section 68 of the Companies Act, 2013. On scrutiny of its records, the following details were observed:

1. The company intends to route the buy-back through its wholly-owned subsidiary.
2. The company had defaulted on repayment of a term loan to a public sector bank, which was fully repaid 27 months ago.
3. The company has not filed its Annual Return and Financial Statements for the preceding financial year.
4. The company had declared a dividend in the last year, but the amount remains unpaid for 35 days from the date of declaration.

You are required to:

Examine the compliance of Alpha Chemicals Ltd. with the requirements of Section 70 of the Companies Act, 2013 and state whether the company is eligible to proceed with the proposed buy-back.

(MTP Sept' 25 S1 4 Marks)

Answer:

As per Section 70 of the Companies Act, 2013, the company cannot buy back its own shares under the following conditions, all of which apply to Alpha Chemicals Ltd.:

1. Buy-back through Subsidiary - Prohibited

- Section 70(1)(a): A company shall not buy back shares through any subsidiary, including wholly owned subsidiaries.

2. Default in Term Loan – Three-Year Cooling Off Required

- Section 70(1)(c): A company that has defaulted in repayment of a term loan can buy back shares only after 3 years from the cessation of default.
- Alpha repaid the loan only 27 months ago — still short of the required 36-month period. Hence, not eligible.

3. Non-Filing of Annual Return and Financial Statements

- Section 70(2): Buy-back is prohibited if the company has not complied with Sections:
 - 92 (Annual Return)
 - 129 (Financial Statements)
- Alpha has failed to file both which disqualifies it from buy-back.

4. Unpaid Dividend for More Than 30 Days

- Section 127 read with Section 70(2): Non-distribution of declared dividend within 30 days is a punishable offence.

Dividend unpaid for 35 days, this is a default.

Alpha Chemicals Ltd. is not eligible to proceed with the buy-back under Section 70 due to multiple violations.

Steps to close the Books of the Vendor Company

1. Open Realization Account and transfer all assets at book value.

Exception: If cash is not taken over by the purchasing company, it should not be transferred.

Note: Profit and Loss Account (Dr.) and expenses not written off are not assets and should not be transferred to the Realization Account.

The journal entry in the above case is:

	Dr.	Rs.	Rs.
Realization A/c		16,20,000	
To Sundries —			
Goodwill			2,40,000
Land & Building			4,00,000
Plant & Machinery			6,00,000
Patents			50,000
Inventory			1,50,000
Trade receivables			1,80,000

(Transfer of assets to Realization Account on sale of business to Wye Ltd.)

2. Transfer to the Realization Account the liabilities which the purchasing company is to take over. In case of the provisions, the portion which represents liability expected to arise in future should be so transferred and the portion which is not required (i.e., the reserve portion) should be treated as profit. Accordingly, the following entry will be recorded:

	Dr.	Rs.	Rs.
6% Debentures in Wye Ltd.	Dr.	2,00,000	
Workmen's Compensation Reserve	Dr.	5,000	
Trade payables	Dr.	1,20,000	
To Realization A/c			3,25,000

(Transfer of liabilities taken over by Wye Ltd. to Realization A/c)

For liabilities not take over by the purchasing company, the profit or loss on discharge of such liabilities shall be transferred to Realization Account.

3. Debit purchasing company and credit Realization Account with the purchase consideration.

Wye Ltd.-	Dr.	17,20,000	
To Realization A/c			17,20,000

(Amount receivable from Wye Ltd. for sale of business)

4. On receipt of the purchase consideration debit what is received (cash, debentures, shares etc.) and credit the purchasing company. Thus —

Cash	Dr.	2,00,000	
9% Preference shares in Wye Ltd.	Dr.	4,00,000	

Equity shares in Wye Ltd. Dr. 11,20,000
To Wye Ltd. 17,20,000

(Receipt of purchase consideration from the purchase company)

5. Expenses of liquidation have to be dealt with according to the circumstances of each case.

(a) If the vendor company has to bear and pay them:

Realization Account should be debited and Cash Account credited.

(b) If the expenses are to be borne by the purchasing company, the question may be dealt within one of the two ways mentioned below:

(i) It may be ignored in the books of the vendor company.

(ii) If the expenses are to be paid first by the vendor company and afterwards reimbursed by the purchasing company, the following two entries will be passed:

(a) Debit Purchasing company and credit Cash Account when expenses are paid by the vendor company; and

(b) Debit Cash Account and credit purchasing company (on the expenses being reimbursed).

In the above mentioned case Wye Ltd. has to pay maximum of Rs.10,000 only whereas, the amount spent is Rs.12,500. Hence Rs.2,500 is to be borne by Zed Ltd.; the entries required will be:

		Rs.	Rs.
Wye Ltd.	Dr.	10,000	
Realization A/c	Dr.	2,500	
To Cash A/c			12,500

(Liquidation expenses out of which

Rs.10,000 is payable by Wye Ltd.)

Cash A/c	Dr.	10,000	
To Wye Ltd.			10,000

(Account reimbursed by Wye Ltd. for expense)

6. Liabilities not assumed by the purchasing company, have to be paid off. On payment, debit the liability concerned and credit cash. Any difference between the amount actually paid and the book figure must be transferred to the Realization Account. Zed Ltd. shall pass the following entries in this respect:

		Rs.	Rs.
Interest Outstanding	Dr.	12,000	
To Debenture holders A/c			12,000

(Amount due to debenture holders
for debentures interest)

Debenture holders	Dr.	12,000	
To Cash A/c			12,000

(Debenture holders paid cash Rs.12,000

for outstanding interest)

7. Credit the preference shareholders with the amount payable to them, debiting Preference Share Capital with the amount shown in the books, transferring the difference between the two, if any, to the Realization Account. Thus —

6% Pref. Share Capital A/c	Dr.	4,00,000	
Realization A/c	Dr.	40,000	
To Preference Shareholders A/c			4,40,000

(The amount due to preference shareholders for capital and the extra amount payable under the scheme of absorption)

Note: In the absence of any indication to the contrary, preference shareholders will be entitled only to the capital contributed by them. But if funds available after paying off creditors are not sufficient to satisfy the claim of preference shareholders fully, they will have to suffer a loss to the extent of the deficit.

8. Pay off preference shareholders by debiting them and crediting whatever is given to them. The entry in the above case is :

	Dr.	Rs.	Rs.
Preference shareholders A/c		4,40,000	
To Cash A/c			40,000
To 9% Preference shares in Wye Ltd.			4,00,000

(Cash and preference shares in Wye Ltd. given to preference shareholders)

9. Transfer equity share capital and account representing profit or loss (including the balance in Realization Account) to Equity Shareholders Account. This will determine the amount receivable by the equity shareholders. Zed Ltd. shall pass the following entries in this regard :

	Dr.	Rs.	Rs.
Equity Share Capital A/c		8,00,000	
Capital Reserve A/c		1,00,000	
Profit and Loss A/c		50,000	
Workmen's Compensation Reserve A/c		3,000	
Realization A/c		3,82,500	
To Equity Shareholders A/c			13,35,500

(Various accounts representing capital and profit transferred to Equity Shareholders Account)

10. On satisfaction of the claims of the equity shareholders, debit their account and credit whatever is given to them. Hence:

Equity Shareholders A/c	Dr.	13,35,500	
To Equity Shares in Wye Ltd.			11,20,000
To Cash A/c (W.N.2)			2,15,500

A Ltd. take over B Ltd. on April 01, 20X1 and discharges consideration for the business as follows:

- (i) Issued 42,000 fully paid equity shares of Rs.10 each at par to the equity shareholders of B Ltd.
- (ii) Issued fully paid up 15% preference shares of Rs.100 each to discharge the preference shareholders (Rs.1,70,000) of B Ltd. at a premium of 10%.
- (iii) It is agreed that the debentures of B Ltd. (Rs.50,000) will be converted into equal number and amount of 13% debentures of A Ltd.

Determine the amount of purchase consideration as per AS 14.

Theoretical Questions

12. What are the conditions which according to AS 14 on Accounting for Amalgamations must be satisfied for an amalgamation in the nature of merger?

Answer:

Amalgamation in the nature of merger is an amalgamation, as per para 3(e) of AS-14, which satisfies all the following conditions:

- i) All the assets and liabilities of the transferor company become, after amalgamation, the assets and liabilities of the transferee company.
- ii) Shareholders holding not less than 90% of the face value of the equity shares of the transferor company (other than the equity shares already held therein, immediately before the amalgamation, by the transferee company or its subsidiaries or their nominees) become equity shareholders of the transferee company by virtue of the amalgamation.
- iii) The consideration for the amalgamation receivable by those equity shareholders of the transferor company who agree to become equity shareholders of the transferee company is discharged by the transferee company wholly by the issue of equity shares in the transferee company, except that cash may be paid in respect of any fractional shares.
- iv) The business of the transferor company is intended to be carried on, after the amalgamation, by the transferee company.
- v) No adjustment is intended to be made to the book values of the assets and liabilities of the transferor company when they are incorporated in the financial statements of the transferee company except to ensure uniformity of accounting policies. For example, if transferor company is following weighted average method for inventory valuation, the book value of the inventory of the transferor company will be revised by applying the FIFO method (if the transferee company follows FIFO method for inventory valuation).

If any one or more of the above conditions are not satisfied in an amalgamation, such amalgamation is called **amalgamation in the nature of purchase**.

13. Distinguish between (i) the pooling of interests method and (ii) the purchase method of recording transactions relating to amalgamation.

Answer:

i) Pooling of Interest Method

Under pooling of interests method, the assets, liabilities and reserves of the Transferor Company will be taken over by Transferee Company at existing carrying amounts unless any adjustment is required due to different accounting policies followed by these companies.

As a result the difference between the amount recorded as share capital issued (plus any additional consideration in the form of cash or other assets) and the amount of share capital of Transferor Company should be adjusted in the reserves of the financial statements of Transferee company (recorded as deduction from the reserves where the capital issued is more than the capital of the transferor company).

In simple terms, where in case of pooling method- the amount to be adjusted against the reserves- can be computed in the following 3 steps-

Step I- Equity Share capital + Preference share capital issued+ any other additional consideration in form of cash and other assets by the Transferee Company.

Step II- Existing Equity share capital + Existing Preference share capital in the books of Transferor Company.

Step III- Step I- Step II= amount to be adjusted from the reserves of Transferee company.

ii) Purchase Method

Assets and Liabilities: the assets and liabilities of the transferor company should be incorporated at their existing carrying amounts or the purchase consideration should be allocated to individual identifiable assets and liabilities on the basis of their fair values at the date of amalgamation.

14. Briefly describe the disclosure requirements for amalgamation including additional disclosure if any for different methods of amalgamation as per AS 14 (Revised).

Answer:

The disclosure requirements for amalgamations have been prescribed in paragraphs 43 to 46 of AS 14 (Revised) on Accounting for Amalgamation. Refer Para 2.5 for details.

15. List the conditions to be fulfilled as per AS 14 (Revised) for an amalgamation to be in the nature of merger in the case of companies.

Answer:

- (iii) The consideration for the amalgamation receivable by those equity shareholders of the transferor company who agree to become equity shareholders of the transferee company is discharged by the transferee company wholly by the issue of equity shares in the transferee company, except that cash may be paid in respect of any fractional shares.
- (iv) The business of the transferor company is intended to be carried on, after the amalgamation, by the transferee company.
- (v) No adjustment is intended to be made to the book values of the assets and liabilities of the transferor company when they are incorporated in the financial statements of the transferee company except to ensure uniformity of accounting policies.

16. Briefly explain the methods of accounting for amalgamation as per Accounting Standard

Answer:

As per AS 14 on 'Accounting for Amalgamations', there are two main methods of accounting for amalgamations:

The Pooling of Interest Method

Under this method, the assets, liabilities and reserves of the transferor company are recorded by the transferee company at their existing carrying amounts (after making the necessary adjustments).

If at the time of amalgamation, the transferor and the transferee companies have conflicting accounting policies, a uniform set of accounting policies is adopted following the amalgamation. The effects on the financial statements of any changes in accounting policies are reported in accordance with AS 5 on 'Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies'.

The Purchase Method

Under the purchase method, the transferee company accounts for the amalgamation either by incorporating the assets and liabilities at their existing carrying amounts or by allocating the consideration to individual identifiable assets and liabilities of the transferor company on the basis of their fair values at the date of amalgamation. The identifiable assets and liabilities may include assets and liabilities not recorded in the financial statements of the transferor company.

Working Notes:

1. Calculation of new Preference Shares

Rate of return : 6% on Preference Shares

Dividend	:	$(6/100) \times ₹6,00,000$	= ₹ 36,000
Rate of return	:	8% on Preference Shares	
Dividend :		$(8/100) \times X =$	₹ 36,000
		$X = (36,000/8) \times 100 =$	₹ 4,50,000
New Preference Share Capital	=		₹ 4,50,000
Old Preference Share Capital	=		₹ 6,00,000
$(6,00,000 - 4,50,000)$	=		₹ 1,50,000 Amount taken to Capital Reduction A/c.

2. Since the company expects to earn a profit of ₹ 90,000 p.a; consecutively for three years and it shall be used to write-off debit balance of P & L account, hence ₹ 2,70,000 being loss shall be shown in the Balance Sheet under Reserve & Surplus head and ₹ 30,000 shall be written-off from Capital Reduction A/c.

3. Calculation of Amount written off on Land & Building and Plant & Machinery

Land & Building	= $(85/100) \times 5,40,000$	= ₹ 4,59,000
Plant & Machinery	= $(80/100) \times 4,80,000$	= ₹ 3,84,000
Reduced by:		
Land & Building	= $(5,40,000 - 4,59,000)$	= ₹ 81,000
Plant & Machinery	= $(4,80,000 - 3,84,000)$	= ₹ 96,000

KP manufactures a range of goods which it sells to wholesale customers only from its head office. In addition, the H.O. transfers goods to a newly opened branch at factory cost plus 15%. The branch then sells these goods to the general public on only cash basis.

The selling price to wholesale customers is designed to give a factory profit which amounts to 30% of the sales value. The selling price to the general public is designed to give a gross margin (i.e., selling price less cost of goods from H.O.) of 30% of the sales value.

KP operates from rented premises and leases all other types of fixed assets. The rent and hire charges for these are included in the overhead costs shown in the trial balances.

From the information given below, you are required to prepare for the year ended 31st Dec., 20X1 in columnar form.

(a) A Profit & Loss account for (i) H.O. (ii) the branch (iii) the entire business.

(b) Balance Sheet as on 31st Dec., 20X1 for the entire business.

	3,10,200	3,10,200	67,200	67,200

Note:

(1) On 28th Dec., 20X1 the branch remitted Rs. 1,500 to the H.O. and this has not yet been recorded in the H.O. books. Also, on the same date, the H.O. dispatched goods to the branch invoiced at Rs. 1,500 and these too have not yet been entered into the branch books. It is the company's policy to adjust items in transit in the books of the recipient.

(2) The stock of raw materials held at the H.O. on 31st Dec., 20X1 was valued at Rs. 2,300.

(3) You are advised that:

- there were no stock losses incurred at the H.O. or at the branch.
- it is KP's practice to value finished goods stock at the H.O. at factory cost.
- there were no opening or closing stock of work-in-progress.

(4) Branch employees are entitled to a bonus of Rs. 156 under a bilateral agreement.

** $(5,000 + 6,904) - 1500 = \text{Rs. } 10,404$.

Working Notes:

(1) Material consumed

Opening raw material + Raw Material Purchased - Closing raw material
 $= 1,800 + 35,000 - 2,300 = 34,500$

(2) Closing stock at head office

(a) Calculation of total factor cost = Material consumed + Wages + Factory overhead
 $= 34,500 + 1,08,500 + 39,000 = 1,82,000$

(b) Cost (factory cost) of goods sold = Sales - Gross profit
 $= 2,00,000 - 2,00,000 \times 30\% = 1,40,000$

(c) Stock transferred to branch = $46,000 \times 100/115 = 40,000$

(d) Closing stock = $13,000$ (Opening Stock) + $1,82,000 - 1,40,000 - 40,000$
 $= 15,000$

(3) Gross profit of Branch = Sales $\times$ Gross profit ratio

$= 65,200 \times 30\% = 19,560$

(4) Closing stock reserve = $9,560 \times 15/115 = 1,247$

Charge to profit and loss = $1,247 - 1,200$ (existing) = 47

Theoretical Questions

6. Why goods are marked on invoice price by the head office while sending goods to the branch?

Answer:

Goods are marked on invoice price to achieve the following objectives:

- (i) To keep secret from the branch manager, the cost price of the goods and profit made, so that the branch manager may not start a rival and competitive business with the concern; and
- (ii) To have effective control on stock i.e. stock at any time must be equal to opening stock plus goods received from head office minus sales made at branch.
- (iii) To dictate pricing policy to its branches, as well as save work at branch because prices have already been decided.

7. Differentiate Branch Accounts with Departmental accounts.

Answer:

Branch accounts may be maintained either at branch or at head office and no allocation problem arises since the expenses in respect of each branch can be identified. However, Departmental accounts are maintained at one place only. Common expenses are distributed among the departments concerned on some equitable basis considered suitable in the case. For details, refer Para 2 of the Chapter to know the differences.

(1) Calculation of closing stock of head office:	₹
Opening Stock of head office	75,000
Goods purchased by head office	9,25,000
10,00,000	
Less: Cost of goods sold $[(10,25,000 + 3,60,000 \times 100/160)]$	(8,65,625)
	1,34,375
(2) Calculation of closing stock of branch:	₹
Goods received from head office [At invoice value]	3,60,000
Less: Invoice value of goods sold $[2,70,000 \times 160/180]$	(2,40,000)
	1,20,000
(3) Calculation of unrealized profit in branch stock:	
Branch stock	₹ 1,20,000
Profit included	60% of cost
Hence, unrealized profit would be = ₹ 1,20,000 × 60/160	₹ 45,000

- (2) Goodwill or Capital Reserve.
- (3) Amount of holding company's profit in the consolidated Balance Sheet assuming holding company's own Profit & Loss Account to be Rs.2,00,000 in each case:

(MTP Sep 25 S1 7M)

Solution:

(1) Minority Interest = Equity attributable to minorities

Equity is the residual interest in the assets of an enterprise after deducting all its liabilities i.e. in this case it should be equal to Share Capital + Profit & Loss A/c

	Minority % Shares Owned [E]	Minority interest as at the date of acquisition [E] × [A + B] Rs.	Minority interest as at the date of consolidation [E] × [C + D] Rs.
Case 1 [100-90]	10 %	15,000	17,000
Case 2 [100-85]	15 %	19,500	18,000
Case 3 [100-80]	20 %	14,000	14,000
Case 4 [100-100]	NIL	Nil	Nil

A = Share capital on 1.1.20X1

B = Profit & loss account balance on 1.1.20X1

C = Share capital on 31.12.20X1

D = Profit & loss account balance on 31.12.20X1

(2) Calculation of Goodwill or Capital Reserve

	Shareholding % [F]	Cost [G]	Total Equity [A] + [B] = [C]	Parent's Portion of equity [F] × [C] = H	Goodwill Rs.[G] - [H]	Capital Reserve Rs.[H] - [G]
Case 1	90 %	1,40,000	1,50,000	1,35,000	5,000	—

Case 2	85 %	1,04,000	1,30,000	1,10,500	—	6,500
Case 3	80 %	56,000	70,000	56,000	Nil	Nil
Case 4	100 %	1,00,000	90,000	90,000	10,000	—

- (3) The balance in the Profit & Loss Account on the date of acquisition (1.1.20X1) is Capital profit, as such the balance of Consolidated Profit & Loss Account shall be equal to Holding Co.'s profit.

On 31.12.20X1 in each case the following amount shall be added or deducted from the balance of holding Co.'s Profit & Loss account.

	% Share holding [K]	P & L as on 1.1.20X1 [L]	P & L as on consolidati on date [M]	P & L post acquisition [N] = [M] - [L]	Amount to be added / (deducted) from holding's P & L [O] = [K] × [N]

XYZ Ltd. purchased 80% shares of ABC Ltd. on 1st January, 20X1 for Rs.1,40,000. The issued capital of ABC Ltd., on 1st January, 20X1 was Rs.1,00,000 and the balance in the Profit & Loss Account was Rs.60,000.

During the year ended 31st December, 20X1, ABC Ltd. earned a profit of Rs.20,000 and at year end, declared and paid a dividend of Rs.15,000.

Show by an entry how the dividend should be recorded in the books of XYZ Ltd.

What is the amount of minority interest as on 1st January, 20X1 and 31st December, 20X1? Also please check whether there should be any goodwill/ capital reserve at the date of acquisition.

Solution:

Total dividend paid is Rs.15,000 (assumed to be out of post-acquisition profits), hence dividend received by XYZ will be credited to P & L.

XYZ Ltd.'s share of dividend = Rs.15,000 X 80% = Rs.12,000

(MTP May 25 S1 14M)

Solution:

The losses applicable to the minority in a consolidated subsidiary may exceed the minority interest in the equity of the subsidiary. In such cases, AS 21 prescribes that the excess, and any further losses applicable to the minority, are adjusted against the majority interest except to the extent that the minority has a binding obligation to, and is able to, make good the losses. If the subsidiary subsequently reports profits, all such profits are allocated to the majority interest until the minority's share of losses previously absorbed by the majority has been recovered.

Where the minority interest has a binding obligation (say by way of a shareholders' agreement), then the share of losses will be attributed to the minority interest even if it exceeds the minority interest in the equity (i.e., debit balance in minority interest). Since information on the existence of a binding obligation is not given in the question, we solve as if such obligation does not exist, and hence the minority interests will be computed as follows:

Year	Profit/(Loss)	Minority Interest (30%)	Additional Consolidated P & L (Dr.) Cr. (for the year ended balance)	Minority's Share of losses borne by A Ltd.		Cost of Control

Variety Ltd. holds 46% of the paid-up share capital of VR Ltd. The shares were acquired at a market price of Rs.17 per share. The balance of shares of VR Ltd. are held by a foreign collaborating company. A memorandum of understanding has been entered into with the foreign company providing for the following:

- The shares held by the foreign company will be sold to Variety Ltd. The price per share will be calculated by capitalising the yield at 15%. Yield, for this purpose, would mean 40% of the average of pre-tax profits for the last 3 years, which were Rs.30 lakhs, Rs.40 lakhs and Rs.65 lakhs.
- The actual cost of the shares to the foreign company was Rs.5,40,000 only. The profit that would accrue to them would be taxable at an average rate of 30%. The tax payable will be deducted from the proceeds and Variety Ltd. will pay it to the Government.
- Out of the net consideration, 50% would be remitted to the foreign company immediately and the balance will be an unsecured loan repayable after two years.

The above agreement was approved by all concerned for being given effect to on 1.4.20X1. The total assets of VR Ltd. as on 31st March, 20X1 was Rs.1,00,00,000. It was decided to write down Property, Plant and Equipment by Rs.1,75,000. Current liabilities of VR Ltd. as on the same date were Rs.20,00,000. The paid-up share capital of VR Ltd. was Rs.20,00,000 divided into 2,00,000 equity shares of Rs.10 each.

Find out goodwill/capital reserve to Variety Ltd. on acquiring wholly the shares of VR Ltd.

Solution:

1. Computation of Purchase Consideration

(a) Yield of VR Ltd.: $\left[\frac{40}{100} \times \frac{30 + 40 + 65}{3} \right]$ Rs.18 lakhs

(b) Price per share of VR Ltd.:

Capitalized Yield: $\left[\frac{18 \text{ lakhs}}{0.15} \right]$ Rs.120 lakhs

No. of shares 2 lakhs

Therefore, price per share Rs.60

(c) Purchase Consideration for 54% shares in VR Ltd.

2 lakh shares x 54% x Rs.60 per shares Rs.64.80 lakhs

(d) Discharge of Purchase Consideration:

Tax at source (Rs.64.80 lakhs - Rs.5.40 lakhs) $\times \frac{30}{100}$ Rs.17.82 lakhs

50% of purchase consideration (net of tax) in cash Rs.23.49 lakhs

Current Assets	68,00,000
Loans and Advances	22,00,000

On the same day B Ltd. declared dividend at 20% and as agreed between both the companies Property, Plant and Equipment were to be depreciated @ 10% and investment to be taken at market value of Rs.60,00,000. Calculate the Goodwill or Capital Reserve to be recorded in Consolidated Financial Statements.

Solution:

Since dividend is declared by B Ltd. on the date of acquisition itself, it would be out of the divisible profits of B Ltd. existing on the date of acquisition i.e., pre-acquisition profits from the perspective of A Ltd.

Accordingly, as per AS 13, such pre-acquisition dividend would be reduced from the cost of investment, as seen below in the determination of Goodwill on the date of acquisition.

	Rs.	Rs.

Property, Plant and Equipment	70,00,000	
Less: Value written off (Rs.70 lakhs x 10%)	(7,00,000)

Investments at Market Value	60,00,000

Share of A Ltd. in Net Assets of B Ltd.: 60%		88,80,000
Less: Cost of Investment in B Ltd. (60% stake):		
10,00,000 Equity Shares x 60% x Rs.20 per share	1,20,00,000	
Less: Pre-acquisition dividend: 6,00,000 shares x Rs.2	(12,00,000)	(1,08,00,000)

H Ltd. acquired 3,000 shares in S Ltd., at a cost of Rs.4,80,000 on 31.7.20X1. The capital of S Ltd. consisted of 5,000 shares of Rs.100 each fully paid. The Profit & Loss Account of this company for 20X1 showed an opening balance of Rs.1,25,000 and profit for the year was Rs.3,00,000. At the end of the year, it declared a dividend of 40%. Record the entry in the books of H Ltd., in respect of the dividend. Assume the profit is accruing evenly and calendar year as financial year.

Solution:

The profits of S Ltd., have to be divided between capital and revenue profits from the point of view of the holding company:

	Capital Profit (Pre- acquisition) Rs.		Revenue Profit (Post- acquisition) Rs.
Balance on 1.1.20X1	1,25,000	—	
Profit for 20X1 (3,00,000 × 7/12)	<u>1,75,000</u>	(3,00,000 × 5/12)	<u>1,25,000</u>
Total	3,00,000		1,25,000
Proportionate share of H Ltd. (3/5)	1,80,000		75,000

Total dividend declared = Rs.5,00,000 X 40 % = Rs.2,00,000

H Ltd.'s share in the dividend = Rs.2,00,000 X 3/5 = Rs.1,20,000

There can be two situations as regards the treatment of dividend of Rs.1,20,000:

(1) The profit for 20X1 has been utilised to pay the dividend.

The share of H Ltd in profit for the first seven months of S Ltd = Rs.1,05,000

(i.e. Rs.1,75,000 × 3/5)

Profit for the remaining five months = Rs.75,000

(i.e. Rs.1,25,000 × 3/5).

The dividend of Rs.1,20,000 will be adjusted in this ratio of 1,05,000: 75,000 = Rs.70,000 out of profits up to 31.7.20X1 and Rs.50,000 out of profits after that date.

The dividend out of profits subsequent to 31.7.20X1 will be revenue income and that out of earlier profits will be capital receipt. Hence the entry will be:

	Rs.	Rs.
Bank Dr.	1,20,000	
To Investment Account		70,000
To Profit and Loss Account		50,000

(2) Later profits have been utilised first and then pre- acquisition profits.

In such a case, the whole of Rs.75,000 (share of H Ltd. in profits of S Ltd., after 31.7.20X1) would be received and treated as revenue income; the remaining dividend, Rs.45,000 (Rs.1,20,000 less Rs.75,000) would be capital receipt. The entry would be:

	Rs.	Rs.
Bank Dr.	1,20,000	
To Investment Account		45,000
To Profit & Loss Account		75,000

Note: Point (2) discussed above can arise only if there is definite information about the profits utilized. In practice, such treatment is rare.

- A Ltd. holds 80% of the equity capital and voting power in B Ltd. A Ltd. sells inventories costing Rs.180 lacs to B Ltd at a price of Rs.200 lacs. The entire inventories remain unsold with B Ltd. at the financial year end i.e. 31 March 20X1.
- A Ltd. holds 75% of the equity capital and voting power in B Ltd. A Ltd. purchases inventories costing Rs.150 lacs from B Ltd at a price of Rs.200 lacs. The entire inventories remain unsold with A Ltd. at the financial year end i.e. 31 March 20X1.

Suggest the accounting treatment for the above-mentioned transactions in the consolidated financial statements of A Ltd. giving reference of the relevant guidance/standard.

**Solution:**

As per para 16 and 17 of AS 21, intragroup balances and intragroup transactions and resulting unrealized profits should be eliminated in full. Unrealized losses resulting from intragroup transactions should also be eliminated unless cost cannot be recovered.

Intragroup balances and intragroup transactions, including sales, expenses and dividends, are eliminated in full. Unrealized profits resulting from intragroup transactions that are included in the carrying amount of assets, such as inventory and fixed assets, are eliminated in full. Unrealized losses resulting from intragroup transactions that are deducted in arriving at the carrying amount of assets are also eliminated unless cost cannot be recovered.

One also needs to see whether the intragroup transaction is "upstream" or "down- stream". Upstream transaction is a transaction in which the subsidiary company sells goods to holding company. While in the downstream transaction, holding company is the seller and subsidiary company is the buyer.

In the case of upstream transaction, since the goods are sold by the subsidiary to holding company; profit is made by the subsidiary company, which is ultimately shared by the holding company and the minority shareholders. In such a transaction, if some goods remain unsold at the balance sheet date, the unrealized profit on such goods should be eliminated from minority interest as well as from consolidated profit on the basis of their share-holding besides deducting the same from unsold inventory.

But in the case of downstream transaction, the whole profit is earned by the holding company, therefore, whole unrealized profit should be adjusted from unsold inventory and consolidated profit and loss account only irrespective of the percentage of the shares held by the parent.

Using above mentioned guidance, following adjustments would be required:

- This would be the case of downstream transaction. In the consolidated profit and loss account for the year ended 31 March 20X1, entire transaction of sale and purchase of Rs.200 lacs each, would be eliminated by reducing both sales and purchases (cost of sales).
Further, the unrealized profits of Rs.20 lacs (i.e. Rs.200 lacs - Rs.180 lacs), would be eliminated from the consolidated financial statements for financial year ended 31 March 20X1, by reducing the consolidated profits/ increasing the consolidated losses, and reducing the value of closing inventories as of 31 March 20X1.
- This would be the case of upstream transaction. In the consolidated profit and loss account for the year ended 31 March 20X1, entire transaction of sale and purchase of Rs.200 lacs each, would be eliminated by reducing both sales and purchases (cost of sales).
Further, the unrealized profits of Rs.50 lacs (i.e. Rs.200 lacs - Rs.150 lacs), would be eliminated in the consolidated financial statements for financial year ended 31 March 20X1, by reducing the value of closing inventories by Rs.50 lacs as of 31 March 20X1. In the consolidated balance sheet as of 31 March 20X1, A Ltd.'s share of profit from B Ltd will be reduced by Rs.37.50 lacs (being 75% of Rs.50 lacs) and the minority's share of the profits of B Ltd would be reduced by Rs.12.50 lacs (being 25% of Rs.50 lacs).

Also consider the following information:

(a) B Ltd. is a subsidiary of A Ltd. Both the companies follow calendar year as the accounting year.

(b) A Ltd. values inventory on weighted average basis while B Ltd. used FIFO basis. To bring B Ltd.'s values in line with those of A Ltd, its value of inventory is required to be reduced by Rs.12,000 at the end of 20X0 and Rs.34,000 at the end of 20X1.

(c) B Ltd. deducts 1% from Trade Receivables as a general provision against doubtful debts.

(d) Prepaid expenses in B Ltd. include advertising expenditure carried forward of Rs.60,000 in 20X0 and Rs.30,000 in 20X1, being part of initial advertising expenditure of Rs.90,000 in 20X0 which is being written off over three years. Similar amount of advertising expenditure of A Ltd. has been fully written off in 20X0.

Restate the balance sheet of B Ltd. as at 31st December, 20X1 after considering the above information, for the purpose of consolidation. Would restatement be necessary to make the accounting policies adopted by A Ltd. and B Ltd. uniform. (MTP Jan 25 S1 14M)

Solution:

As per para 20 and 21 of AS 21, Consolidated financial statements:

Consolidated financial statements should be prepared using uniform accounting policies for like transactions and other events in similar circumstances. If it is not practicable to use uniform accounting

policies in preparing the consolidated financial statements, that fact should be disclosed together with the proportions of the items in the consolidated financial statements to which the different accounting policies have been applied.

If a member of the group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to its financial statements when they are used in preparing the consolidated financial statements.

Accordingly in the given case, restatement would be required to make the accounting policies of A Ltd and B Ltd uniform.

Adjusted reserves of B Ltd.:

Less: Reduction in value of Inventory	34,000	
Advertising expenditure to be written off	<u>30,000</u>	<u>(64,000)</u>

Note: No adjustment would be required in respect of opening inventory of B Ltd as that will not have any impact on P & L.

6. Hemant Ltd. purchased 80% shares of Power Ltd. on 1st January, 20X1 for Rs.2,10,000. The issued capital of Power Ltd., on 1st January, 20X1 was Rs.1,50,000 and the balance in the Profit & Loss Account was Rs.90,000. During the year ended 31st December, 20X1, Power Ltd. earned a profit of Rs.30,000 and at year end, declared and paid a dividend of Rs.22,500. What is the amount of minority interest as on 1st January, 20X1 and 31st December, 20X1? Also compute goodwill/ capital reserve at the date of acquisition.

Answer:

Total dividend paid is Rs.22,500 (out of post-acquisition profits), hence dividend received by Hemant will be credited to P & L account. Hemant Ltd.'s share of dividend = Rs.22,500 X 80% = Rs.18,000

Answer:

Minority Interest = Equity attributable to minorities

Equity is the residual interest in the assets of an enterprise after deducting all its liabilities i.e. in this case, it should be equal to Share Capital + Profit & Loss A/c

A = Share capital on 1.1.20X1

B = Profit & loss account balance on 1.1.20X1 C = Share capital on 31.12.20X1

D = Profit & loss account balance on 31.12.20X1

	Minority % Shares Owned	Minority interest as at the date of acquisition	Minority interest as at the date of consolidation
	[E]	[E] × [A + B] Rs.	[E] × [C + D] Rs.
Case A [100-90]	10 %	22,500	23,500
Case B [100-75]	25 %	50,000	40,000
Case C [100-70]	30 %	18,000	18,000
Case D [100-95]	5%	4,750	5,750

7. Unrealized profit in respect of inventory

Rs.100 lakhs $\times$ 25/125 = Rs.20 lakhs

8. Computation of bonus to equity shareholders

Rs.In lakhs

Shares as on 31 March 20X1 including bonus share issued on 1 January 20X1 4,800

Or we can say these are $1 + \frac{3}{5} + \frac{8}{5}$

i.e. Shares before bonus issue should have been $\frac{4,800}{8/5} = 3,000$

Accordingly, bonus issue would be (4,800-3,000) 1,800

With reference to para no 15 of AS 21

If an enterprise makes two or more investments in another enterprise at different dates and eventually obtains control of the other enterprise, the consolidated financial statements are presented only from the date on which holding-subsidiary relationship comes in existence. If two or more investments are made over a period of time, the equity of the subsidiary at the date of investment, for the purposes of paragraph 13 above, is generally determined on a step-by-step basis; however, if small investments are made over a period of time and then an investment is made that results in control, the date of the latest investment, as a practicable measure, may be considered as the date of investment.

And para no 22 of AS 21 The results of operations of a subsidiary are included in the consolidated financial statements as from the date on which parent-subsidiary relationship came in existence. The results of operations of a subsidiary with which parent-subsidiary relationship ceases to exist are included in the consolidated statement of profit and loss until the date of cessation of the relationship. The difference between the proceeds from the disposal of investment in a subsidiary and the carrying amount of its assets less liabilities as of the date of disposal is recognised in the consolidated statement of profit and loss as the profit or loss on the disposal of the investment in the subsidiary. In order to ensure the comparability of the financial statements from one accounting period to the next, supplementary information is often provided about the effect of the acquisition and disposal of subsidiaries on the financial position at the reporting date and the results for the reporting period and on the corresponding amounts for the preceding period.

Particulars	Amount (₹)
Issued share capital of Tyre Ltd. on 31/03/2024	5,00,000

Profit earned during the year 2024-25	45,000
5% Dividend declared and paid by Tyre Ltd. for 2023-24	25,000

You are required to calculate:

- The capital reserve / goodwill at the date of acquisition.

The calculations are to be made under the following assumptions:

Case (i) It is assumed that the dividend is paid out of post-acquisition profits.

Case (ii) It is assumed that the dividend is received for pre-acquisition period.

(PYP May 25 4M)

Answer:

Calculation of capital reserve/goodwill at the date of acquisition

Case (i) it is assumed Dividend is paid out of post-acquisition profits

Total dividend paid is ₹ 25,000 hence dividend received by Rubber will be credited to P & L.

Rubber Ltd.'s share of dividend = ₹ 25,000 X 70% = ₹ 17,500

Goodwill on consolidation (at the date of acquisition):

	₹	₹

Cost of shares		4,05,000
Less: Face value of capital i.e. 70% of capital 5,00,000	3,50,000	
Add: Share of capital profits [70,000X 70%]	49,000	(3,99,000)
Goodwill		6,000

Case (ii) it is assumed Dividend is received out of pre-acquisition profits.

Since dividend received is for pre-acquisition period, it has been reduced from the cost of investment in the subsidiary company

Goodwill on consolidation (at the date of acquisition):	₹	₹
Cost of shares		4,05,000
Less: dividend received		(17,500)
		3,87,500
Less: Face value of capital i.e. 70% of capital 5,00,000	3,50,000	
Add: Share of capital profits [70,000 X 70%]	49,000	(3,99,000)
Capital reserve		11,500

Investment in B Ltd.	-

- ◆ If, under the equity method, an investor's share of losses of an associate equals or exceeds the carrying amount of the investment, the investor ordinarily discontinues recognising its share of further losses and the investment is reported at nil value. Additional losses are provided for to the extent that the investor has incurred obligations or made payments on behalf of the associate to satisfy obligations of the associate that the investor has guaranteed or to which the investor is otherwise committed. If the associate subsequently reports profits, the investor resumes including its share of those profits only after its share of the profits equals the share of net losses that have not been recognised.
- ◆ As far as possible the reporting date of the financial statements should be same for consolidated financial statement. If practically it is not possible to draw up the financial statements of one or more enterprise to such date and, accordingly, those financial statements are drawn up to reporting dates different from the reporting date of the investor, adjustments should be made for the effects of significant transactions or other events that occur between those dates and the date of the consolidated financial statements. In any case, the difference between reporting dates of the concern and consolidated financial statement should not be more than six months.
- ◆ Accounting policies followed in the preparation of the financial statements of the investor, investee and consolidated financial statement should be uniform for like transactions and other events in similar circumstances.

If accounting policies followed by different enterprises in the group are not uniform, then adjustments should be made in the items of the individual financial statements to bring it in line with the accounting policy of the consolidated statement.

- ◆ The carrying amount of investment in an associate should be reduced to recognise a decline, other than temporary, in the value of the investment, such reduction being determined and made for each investment individually.

Theoretical Questions

6. Describe the cases when AS 23 does not allow the use of equity method of accounting?

Answer:

Equity method of accounting is to be followed by all the enterprises having significant influence on their associates except in the following cases:

- a. Control is intended to be temporary because the investment is acquired and held exclusively with a view to its subsequent disposal in the near future.

The term 'Near Future' is explained with AS 21.

Or;

- b. It operates under severe long-term restrictions, which significantly impair its ability to transfer funds to the investor.

In both the above cases, investment of investor in the share of the investee is treated as investment according to AS 13.

7. When is an investor required to discontinue the use of the equity method of accounting?

Answer:

An investor should discontinue the use of the equity method from the date that:

- a. It ceases to have significant influence in an associate but retains, either in whole or in part, its investment.
- b. The use of the equity method is no longer appropriate because the associate operates under severe long-term restrictions that significantly impair its ability to transfer funds to the investor.

From the date of discontinuing the use of the equity method, investments in such associates should be accounted for in accordance with AS 13, Accounting for Investments. For this purpose, the carrying amount of the investment at that date should be regarded as cost thereafter.

Questions from MRP [MTPs, RTPs, Past Exam Papers]

Question 1: A Ltd. invested Rs. 1,00,000 to acquire 10% stake (Investment I) in B Ltd. and later invested Rs. 3,00,000 to acquire additional 20% (Investment II). The net asset value of the B Ltd. at the respective investment dates was Rs. 7,50,000 and Rs. 12,50,000 respectively. Determine whether B Ltd. is an associate of A Ltd. Also, calculate goodwill arising on the acquisition of the associate. (RTP Jan 25)

Answer:

As per para 3 of AS 23 an associate is an enterprise in which the investor has significant influence and which is neither a subsidiary nor a joint venture of the investor. Significant influence may be gained by share ownership, statute or agreement. As regards share ownership, if an investor holds, directly or indirectly through subsidiary(ies), 20% or more of the voting power of the investee, it is presumed that the investor has significant influence, unless it can be clearly demonstrated that this is not the case. In this case, A Ltd. has invested 30 % in B Ltd. so B Ltd. is to be considered as an associate of A Ltd.

The goodwill arising on the acquisition of the associate will be computed as follows:

		Rs.
Investment I		1,00,000
Share of net assets	(10 percent of Rs. 7,50,000)	(75,000)
Goodwill (A)		25,000
Investment II		3,00,000
Share of net assets	(20 percent of Rs. 12,50,000)	(2,50,000)
Goodwill (B)		50,000
Total goodwill (A + B)		75,000

Question 2: Hill Ltd. has a share capital of 50,000 shares @ Rs. 100 per share. Sun Ltd. acquired 15% shares in Hill Ltd. on 1.4.2024. It also acquired all the 5,000, 12% convertible debentures of Rs. 100 each of Hill Ltd. These debentures will be converted at par into equity shares of Hill Ltd. after 3 years. State whether, as per AS 23, Hill Ltd. is an Associate of Sun Ltd. or not with reasons? (RTP Sep 2024)

Answer:

As per para 3 of AS 23 'Accounting for Investments in Associates in Consolidated Financial Statements', an associate is an enterprise in which the investor has significant influence and which is neither a subsidiary nor a joint venture of the investor.

Standard further explains in para 4 that as regards share ownership, if an investor holds, directly or indirectly through subsidiary (ies), 20% or more of the voting power of the investee, it is presumed that the investor has significant influence, unless it can be clearly demonstrated that this is not the case. Conversely, if the investor holds, directly or indirectly through subsidiary (ies), less than 20% of the voting power of the investee, it is presumed that the investor does not have significant influence, unless such influence can be clearly demonstrated.

Further as per an explanation to para 4 of the standard, for the purpose of classification of associate, the potential equity shares of the investee held by the investor will not be taken into account for determining the voting power of the investor. In other words, the voting power should be determined on the basis of the current outstanding securities with voting rights.

As per the information given in the question, Sun Ltd. presently holds indirectly 22.7% shares (with and without voting rights) (Refer W.N.) in Hill Ltd. However, the current outstanding securities with voting

rights in Hill Ltd. is only 15% and the remaining holding is on account of potential equity shares. Since potential equity shares do not have voting rights they will not be taken into consideration while determining the significant influence of Sun Ltd. on Hill Ltd. Hence, Hill Ltd. is not an associate of Sun Ltd.

Working Note:

Calculation of percentage of holding of shares after conversion

	Rs.
Current holding is 15% i.e. 7,500 shares of Rs. 100 each	7,50,000
Potential equity shares i.e. 5,000 shares of Rs. 100 each	<u>5,00,000</u>
	<u>12,50,000</u>

Total share capital of Hill Ltd. after conversion of debentures into equity shares will be

= Rs. 50,00,000 + Rs. 5,00,000 = Rs. 55,00,000

Percentage of holding = Rs. $(12,50,000/55,00,000) \times 100 = 22.7\%$ approx.

Theoretical Questions

6. Describe the cases when AS 27 does not allow the use of Proportionate consolidation method of accounting?

Answer:

Proportionate consolidation method of accounting is to be followed except in the following cases:

- a. Investment is intended to be temporary because the investment is acquired and held exclusively with a view to its subsequent disposal in the near future.

The term 'Near Future' is explained with AS 21.

Or

- b. joint venture operates under severe long-term restrictions, which significantly impair its ability to transfer funds to the venturers.

In both the above cases, investment of venturer in the share of the investee is treated as investment according to AS 13.

7. When is a venturer required to discontinue the use of the proportionate consolidation method?

Answer:

A venturer should discontinue the use of the proportionate consolidation method from the date that:

- a. It ceases to have joint control in the joint venture but retains, either in whole or in part, its investment.
- b. The use of the proportionate consolidation method is no longer appropriate because the joint venture operates under severe long- term restrictions that significantly impair its ability to transfer funds to the venturers.

From the date of discontinuing the use of the proportionate consolidation method,

- a. If interest in entity is more than 50%, investments in such joint ventures should be accounted for in accordance with AS 21, Consolidated Financial Statement.
- b. If interest is 20% or more but up to 50%, investments are to be accounted for in accordance with AS 23, Accounting for Investment in Associates in Consolidated Financial Statement.
- c. For all other cases investment in joint venture is treated as per AS 13, Accounting for Investment.
- d. For this purpose, the carrying amount of the investment at the date on which joint venture relationship ceases to exist should be regarded as cost thereafter.

Scenario Based Questions

8. JVR Limited has made investments of Rs.97.84 crores in equity shares of QSR Limited in pursuance of Joint Venture agreement till 20X1 - X2 (i.e., more than 12 months). The investment has been made at par. QSR Limited has been in continuous losses for the last 2 years. JVR Limited is willing to reassess the carrying amount of its investment in QSR Limited and wish to provide for diminution in value of investments. However, QSR Limited has a futuristic and profitable business plans and projection for the coming years. Discuss whether the contention of JVR Limited to bring down the carrying amount of investment in QSR Limited is in accordance with the Accounting Standard.

Answer:

As per para 26 of AS 27 "Financial Reporting of Interests in Joint Ventures", in a venturer's separate financial statements, interest in a jointly controlled entity should be accounted for as an investment in accordance with AS 13 'Accounting for Investments'.

As per para 17 of AS 13 "Accounting for Investments", long-term investments are usually carried at cost. However, when there is a decline, other than temporary, in the value of a long-term investment, the carrying amount is reduced to recognize the decline. Indicators of the value of an investment are obtained by reference to its market value, the investee's assets and results and the expected cash flows from the investment. The type and extent of the investor's stake in the investee are also taken into account. However, where there is a decline, other than temporary, in the carrying amounts of long-term investments, the resultant reduction in the carrying amount is charged to the profit and loss statement.

Since the investment was made in the year 20X1-20X2 i.e., more than a year, it is a long-term investment. In the given case, though the QSR Ltd. is in continuous losses for past 2 years, yet it has a futuristic and profitable business plans and projections for the coming years. Here, one of the indicators i.e. 'losses incurred to the company' may lead to diminution in the value of the shares while the other indicator that 'the company has positive expected cash flows from its business plans' does not lead to decline in the value of shares.

Considering both the facts, in case the expectation of profitable business plans and positive cash flows is based reliable presumptions (such as tender in favour of QSR Ltd., strong order book etc.), the decline will be regarded as temporary in nature and the investment in equity shares will continue to be carried at cost only.

However, should the aforesaid presumptions be based on projections without reasonable evidence backing the claims, the decline could be regarded as non-temporary in nature in which case the write down of the carrying amount become necessary in line with AS 13, thereby implying the contention of QSR Ltd. to be correct.

6. Briefly explain the process of issuance of Indian Accounting Standards.

Answer:

Due to the recent stream of overseas acquisitions by Indian companies, there is need for adoption of high-quality standards to convince foreign enterprises about the financial standing as also the disclosure and governance standards of Indian acquirers.

The Government of India in consultation with the ICAI decided to converge and not to adopt IFRSs issued by the IASB. The decision of convergence rather than adoption was taken after the detailed analysis of IFRSs requirements and extensive discussion with various stakeholders.

The ICAI has worked towards convergence of global accounting standards by considering the application of IFRS in Indian corporate environment. Recognising the growing need of full convergence of Ind AS with IFRS, ICAI constituted a Task Force to examine various issues involved.

Ind AS are issued by the Central Government of India under the supervision and control of ASB of ICAI and in consultation with NFRA. NFRA recommends these standards to the MCA and MCA has to spell out the accounting standards applicable for companies in India.

7. Explain the significance of emergence of IFRS as Global Standards.

Answer:

Global Standards facilitate cross border flow of money, global listing in different bourses and comparability of financial statements. Global Standards improve the ability of investors to compare investments on a global basis and thus lowers their risk of errors of judgment. It facilitates accounting and reporting for companies with global operations and eliminates some costly requirements say reinstatement of financial statements.

8. What do you mean by Carve outs/ins in Ind AS? Explain.

Answer:

Certain changes have been made in Ind AS considering the economic environment of the country, which is different as compared to the economic environment presumed to be in existence by IFRS. These differences are due to differences in economic conditions prevailing in India. These differences which are in deviation to the accounting principles and practices stated in IFRS, are commonly known as 'Carve-outs'. Additional guidance given in Ind AS over and above what is given in IFRS, is termed as 'Carve in'.

Question 1: "Accounting Standards standardize diverse accounting policies with a view to eliminate the non-comparability of financial statements and improve the reliability of financial statements." Discuss and explain the benefits of Accounting Standards. (MTP April '23)

Answer:

Accounting Standards standardize diverse accounting policies with a view to eliminate the non-comparability of financial statements and improve the reliability of financial statements. Accounting Standards provide a set of standard accounting policies, valuation norms and disclosure requirements. Accounting standards aim at improving the quality of financial reporting by promoting comparability, consistency and transparency, in the interests of users of financial statements. The following are the benefits of Accounting Standards:

- (i) **Standardization of alternative accounting treatments:** Accounting Standards reduce to a reasonable extent confusing variations in the accounting treatment followed for the purpose of preparation of financial statements.
- (ii) **Requirements for additional disclosures:** There are certain areas where important is not statutorily required to be disclosed. Standards may call for disclosure beyond that required by law.
- (iii) **Comparability of financial statements:** The application of accounting standards would facilitate comparison of financial statements of different companies situated in India and facilitate comparison, to a limited extent, of financial statements of companies situated in different parts of the world. However, it should be noted in this respect that differences in the institutions, traditions and legal systems from one country to another give rise to differences in Accounting Standards adopted in different countries.

Illustration 2

A trader commenced business on 01/01/20X1 with Rs.12,000 represented by 6,000 units of a certain product at Rs.2 per unit. During the year 20X1 he sold these units at Rs.3 per unit and had withdrawn Rs.6,000. Let us assume that the price of the product at the end of year is Rs.2.50 per unit. In other words, the specific price index applicable to the product is 125.

Current cost of opening stock = $(Rs.12,000 / 100) \times 125 = 6,000 \times Rs.2.50 = Rs.15,000$

Current cost of closing cash = Rs.12,000 (Rs.18,000 - Rs.6,000)

Opening equity at closing current costs = Rs.15,000

Closing equity at closing current costs = Rs.12,000

Retained Profit = Rs.12,000 - Rs.15,000 = (-) Rs.3,000

The negative retained profit indicates that the trader has failed to maintain his capital. The available fund of Rs.12,000 is not sufficient to buy 6,000 units again at increased price of Rs.2.50 per unit. The drawings should have been restricted to Rs.3,000 (Rs.6,000 - Rs.3,000). Had the trader withdrawn Rs.3,000 instead of Rs.6,000, he would have left with Rs.15,000, the fund required to buy 6,000 units at Rs.2.50 per unit.

You are required to compute the Capital maintenance under all three bases ie. (i) Historical costs, (ii) Current purchasing power and (iii) Physical capital maintenance.

Solution:

Financial Capital Maintenance at historical costs

	Rs.	Rs.
Closing capital (At historical cost)		12,000
Less: Capital to be maintained		
Opening capital (At historical cost)	12,000	
Introduction (At historical cost)	Nil	(12,000)
Retained profit		Nil

Financial Capital Maintenance at current purchasing power

	Rs.	Rs.
Closing capital (At closing price)		12,000
Less: Capital to be maintained		

Opening capital (At closing price)	15,000	
Introduction (At closing price)	<u>Nil</u>	<u>(15,000)</u>
Retained profit/(loss)		<u>(3,000)</u>

Physical Capital Maintenance

	Rs.	Rs.
Closing capital (At current cost) (4,800 units)		12,000
Less: Capital to be maintained		
Opening capital (At current cost) (6,000 units)	15,000	
Introduction (At current cost)	<u>Nil</u>	<u>(15,000)</u>
Loss resulting in non-maintenance of capital		<u>(3,000)</u>

Scenario Based Questions

8. Mohan started a business on 1st April 20X1 with Rs.12,00,000 represented by 60,000 units of Rs.20 each. During the financial year ending on 31st March, 20X2, he sold the entire stock for Rs.30 each. In order to maintain the capital intact, calculate the maximum amount, which can be withdrawn by Mohan in the year 20X1-X2 if Financial Capital is maintained at historical cost. (MTP May 25 S1 4M)

Answer:

Particulars	Financial Capital Maintenance at Historical Cost (Rs.)
Closing equity (Rs.30 x 60,000 units)	18,00,000 represented by cash
Opening equity	60,000 units x Rs.20 = 12,00,000

11. A Ltd. has entered into a binding agreement with Gamma Ltd. to buy a custom made machine Rs.1,00,000. At the end of 20X1 - X2, before delivery of the machine, A Ltd. had to change its method of production. The new method will not require the machine ordered and it will be scrapped after delivery. The expected scrap value is nil.
- You are required to advise the accounting treatment and give necessary journal entry in the year 20X1 - X2.

Answer:

A liability is recognised when outflow of economic resources in settlement of a present obligation can be anticipated and the value of outflow can be reliably measured. In the given case, A Ltd. should recognise a liability of Rs.1,00,000 to Gamma Ltd.

When flow of economic benefit to the enterprise beyond the current accounting period is considered improbable, the expenditure incurred is recognised as an expense rather than as an asset. In the present case, flow of future economic benefit from the machine to the enterprise is improbable. The entire amount of purchase price of the machine should be recognised as an expense.

Questions from MRP [MTPs, RTPs, Past Exam Papers]

Question 1: Explain in brief the alternative measurement bases for determining the value at which an element can be recognized in the Balance Sheet or Statement of Profit and Loss.

[MTP Oct '23]

Answer:

The Framework for Recognition and Presentation of Financial statements recognizes four alternative measurement bases for the purpose of determining the value at which an element can be recognized in the balance sheet or statement of profit and loss. These bases are: (i) Historical Cost; (ii) Current cost (iii) Realizable (Settlement) Value and (iv) Present Value.

A brief explanation of each measurement basis is as follows:

- 1. Historical Cost:** Historical cost means acquisition price. According to this, assets are recorded at an amount of cash or cash equivalent paid or the fair value of the asset at the time of acquisition. Liabilities are generally recorded at the amount of proceeds received in exchange for the obligation.
- 2. Current Cost:** Current cost gives an alternative measurement basis. Assets are carried out at the amount of cash or cash equivalent that would have to be paid if the same or an equivalent asset was acquired currently. Liabilities are carried at the undiscounted amount of cash or cash equivalents that would be required to settle the obligation currently.
- 3. Realizable (Settlement) Value:** As per realizable value, assets are carried at the amount of cash or cash equivalents that could currently be obtained by selling the assets in an orderly disposal. Liabilities are carried at their settlement values; i.e. the undiscounted amount of cash or cash equivalents paid to satisfy the liabilities in the normal course of business.
- 4. Present Value:** Under present value convention, assets are carried at present value of future net cash flows generated by the concerned assets in the normal course of business. Liabilities under this convention are carried at present value of future net cash flows that are expected to be required to settle the liability in the normal course of business.

Question 2: Opening Balance Sheet of Mr. A is showing the aggregate value of assets, liabilities and equity Rs. 8 lakh, Rs. 3 lakh and Rs. 5 lakh respectively. During accounting period, Mr. A has the following transactions:

Question 6: A trader commenced business on April 1, 2020 with ₹ 120,000, represented by 6000 units of a certain product at ₹ 20 per unit. During the year 2020-21 he sold these units at ₹ 30/- per unit and had withdrawn ₹ 60,000. The price of the product at the end of financial year was ₹ 25/- per unit. Compute retained profit of the trader under the concept of physical capital maintenance at current cost. Also, state, whether answer would be different if the trader had not withdrawn any amount.(MTP Sep '23)

**Answer:**

Physical Capital Maintenance at Current Cost

In the given case, the specific price index applicable to the product is 125 (25/20X100).

Current cost of opening stock = (₹ 1, 20,000 / 100) × 125 Or 6,000 unit's × ₹ 25 = ₹ 1,50,000

Current cost of closing cash = ₹ 1,20,000 (₹ 1,80,000 - ₹ 60,000)

Opening equity at closing current costs = ₹ 1,50,000

Closing equity at closing current costs = ₹ 1,20,000

Retained Profit = ₹ 1,20,000 - ₹ 1,50,000 = (-) ₹ 30,000

The negative retained profit indicates that the trader has failed to maintain his capital. The available fund of ₹ 1,20,000 is not sufficient to buy 6,000 units again at increased price of ₹ 25 per unit. The drawings should have been restricted to ₹ 30,000 (₹ 60,000 - ₹ 30,000).

If the trader had not withdrawn any amount, then the answer would have been as below:

Current cost of opening stock = ₹ 1,80,000

Opening equity at closing current costs = ₹ 1,50,000

Retained Profit = ₹ 1,80,000 - ₹ 1,50,000 = ₹ 30,000

If the trader had not withdrawn any amount, then the retained profit would have been ₹ 30,000.

Question 7: As on 1st April, 2021 opening Balance Sheet of Mr. Mohanty is showing the aggregate value of Assets, Liabilities and Equity ₹ 12 Lakhs, 3 Lakhs and 9 lakhs respectively. During the accounting period 01/04/2021 to 31/03/2022, Mr. Mohanty has the following transactions:

- (1) A liability of ₹ 50,000 was finally settled at a discount of 2%.
- (2) Dividend earned @ 15% on 1,000 (F.V 100 each) Equity shares held @ ₹ 12,000.
- (3) Rent of the premises paid ₹ 20,000.
- (4) Mr. Mohanty withdrew ₹ 10,000 for personal purposes and also withdrew Goods worth ₹ 5,000 for personal purposes.
- (5) ₹ 15,000 were received against Bill Receivables.

You are required to show the effect of the above transactions on Balance Sheet in the form of Assets - Liabilities = Equity equation after each transaction. . (PYP Nov '22)

Answer:

Effects of each transaction on Balance sheet of the trader is shown below:

Transactions	Assets	-	Liabilities	=	Equity
	₹ lakh		₹ lakh		₹ lakh
Opening	12	-	3	=	9
(1) Settlement of Creditors	12 - 0.49 11.51	-	3 - 0.50 2.5	=	9.0 + 0.01 9.01
(2) Dividend earned	11.51 + 0.15 11.66	-	2.5	=	9.01 + 0.15 9.16
(3) Rent paid	11.66 - 0.20 11.46	-	2.5	=	9.16 - 0.20 8.96
(4) Drawings	11.46 - 0.15 11.31	-	2.5	=	8.96 - 0.15 8.81
(5) *Money received against Bills receivables	11.31 + 0.15 - 0.15 11.31	-	2.5	=	8.81

*No change as cash received from bills receivable will have impact on individual asset only (will reduce bill receivables with corresponding increase in cash).
