Mr Ganesh took a Housing loan from Axis Bank on 1/10/2022 for ₹ 2500000 @ 9% Interest. He made repayment as follows

1/4/2023 :- 300000
1/12/2024 :- 400000
1/1/2025 :- 200000
1/7/2025 :- 300000

Construction completed on 10/12/24. Calculate Interest to be allowed for PY 25-26 (AY 26-27)

PY 22-23 = 2500000 × 9% × 6/12 — 112500
23-24 = 2200000 × 9% — 198000
× 24-25 (2200000 × 9% × 8/12) + (1800000 × 9% × 1/2) + (1600000 × 9% × 3/12)
132000 + 13500 + 36000 = 181500
25-26 (1600000 × 9% × 3/12) + (1300000 × 9% × 9/12)
36000 + 87750 = 123750 + 62100

Int amt available = 185850

Pre construction period = 112500 + 198000
= 310500 / 5 = 62100

Actual Rent will never be divided because it is always for LOP portion

In case of immovable property held as SIT, if SDV > 110% consideration then SDV is treated as FVOC while calculating Business Income.

If Assessee not satisfied with SDV then his case may transfer to VO (same as sec 50C).

Normally SDV considered on the date of registration but if date of registration and agreement are not same then Assessee can relice SDV on the date of agreement if he rec'd consdn or part there off by account pay check, account pay demand draft, ECS upto date of agreement.

DA In terms means DA which is forming part of Retirement Benefit Calculation. In all the RBC formulas, DA is considered only if it is "In terms"

Commission: It is fully taxable whether commission is based on Turnover or Not.

Leave credit = Leave Allowed − Leave taken

12 months = 30 months − Leave (1.5×20) taken

Leave taken = 18 months

IT Act :- Leave credit = Leave Allowed − Leave taken

2 months = (20 months − 18 months)
