

## CA Final Subject wise Strategy

### Paper 3 - Advanced Auditing and Professional Ethics (Audit).

#### Points to Remember :-

1. Understanding Concepts is important but Byhearting them is even more Important.
2. Revision is the only way out. Revise as many numbers of times as possible.
3. I feel, doing Audit daily for 20-30 mins doesn't help because it will not give you that entire flow of studying, rather revise at least for few hours or complete 2-3 topics together. It helps to recollect better.
4. Watching revision videos is good, but that doesn't mean your Revision is done. You have to sit with book yourself & self-study. This will only help in scoring Marks.
5. Focus more on Important Topics like Professional Ethics, Audit in Automated Environment, Peer/Quality Review, Standards on Auditing etc.
6. ICAI MCQ's are a Must Solve. It will help understand what ICAI expects & how it interprets the answers because language is Subjective.
7. Try & summarize things, recollect & remember it with any tricks which you are comfortable (some random funny story, mnemonics etc.)
8. Forgetting things, Not Recollecting things is very Normal. Soo....Don't Worry, it happens with everyone. Again go Read & Revise.
