

AS 15 – EMPLOYEE BENEFITS

Illustration 1

What are the kinds of employees covered in the revised AS 15 and whether a formal employer employee relationship is necessary or not, for benefits to be covered under the Standard?

Solution

The Standard does not define the term “employee”. Paragraph 6 of the Standard states that ‘an employee may provide services to an enterprise on a full time, part time, permanent, casual or temporary basis and the term would also include the whole-time directors and other management personnel. The Standard is applicable to all forms of employer employee relationships. There is no requirement for a formal employer employee relationship. Several factors need to be considered to determine the nature of relationship.

Generally, ‘outsourcing contracts’ may not meet the definition of employer -employee relationship. However, such contracts need to be carefully examined to distinguish between a “contract of service” and a “contract for services”. A ‘contract for services’ implies a contract for rendering services, e.g., professional or technical services which is subject to limited direction and control whereas a ‘contract of service’ implies a relationship of an employer and employee, and the person is obliged to obey orders in the work to be performed and as to its mode and manner of performance.

Illustration 2

Whether an enterprise is required to provide for employee benefits arising from informal practices?

Solution

Paragraph 3(c) of the Standard defines employee benefits to include those informal practices that give rise to an obligation where the enterprise has no realistic alternative but to pay employee benefits. The historical pattern of granting such benefits, the expectation created and the impact on the relationship with employees in the event such benefit is withdrawn should be considered in determining whether the informal practice gives rise to a benefit covered by the Standard. For example, where an employer has a practice of making a lumpsum payment on occasion of a festival or regularly grants advances against informal benefits to employees it would be necessary to provide for such benefits.

Careful judgement should be applied in assessing whether an obligation has arisen particularly in instances where an enterprise's practice is to provide improvements only during the collective bargaining process and not during any informal process. If the employer has not set a pattern of benefits that can be projected reliably to give rise to an obligation there is no requirement to provide for the benefits.

However, if the practice established by an employer was that of a consistent benefit granted either as part of union negotiations or otherwise that clearly established a pattern (e.g., a cost of living adjustment or fixed rupee increase), it could be concluded that an obligation exists and that those additional benefits should be included in the measurement of the benefit obligation.

Employee benefits include:

- a) Short-term employee benefits (e.g., wages, salaries, paid annual leave and sick leave, profit sharing bonuses etc. (payable within 12 months of the year-end) and non-monetary benefits for current employees.
- b) Post-employment benefits (e.g., gratuity, pension, provident fund, postemployment medical care etc.).
- c) long-term employee benefits (e.g., long-service leave, long-term disability benefits, bonuses not wholly payable within 12 months of the year end etc.), and
- d) termination benefits (e.g. VRS payments)

The Standard lays down recognition and measurement criteria and disclosure requirements for the above four types of employee benefits separately.

Illustration 6 (RTP May'24)

Neerav Ltd., is in engineering industry. The company received an actuarial valuation for the first time for its pension scheme which revealed a surplus of ₹ 6 lakhs. It wants to spread the same over the next 2 years by reducing the annual contribution to ₹ 2 lakhs instead of ₹ 5 lakhs; The average remaining life of the employee is estimated to be 6 years. You are required to advise the company in accordance with AS 15.

Solution:

According to para 92 of AS 15 (Revised) "Employee Benefits", actuarial gains and losses should be recognized immediately in the statement of profit and loss as income or expense. Therefore, surplus of ₹ 6 lakhs in the pension scheme on its actuarial valuation is required to be credited to the profit and loss statement of the current year. Hence, Neerav Ltd. cannot spread the actuarial gain of ₹ 6 lakhs over the next 2 years by reducing the annual contributions to ₹ 2 lakhs instead of ₹ 5 lakhs. It has to contribute ₹ 5 lakhs annually for its pension schemes.

Illustration 7

As on 1st April, 20X1 the fair value of plan assets was ₹ 1,00,000 in respect of a pension plan of Zeleous Ltd. On 30th September, 20X1 the plan paid out benefits of ₹ 19,000 and received inward contributions of ₹ 49,000. On 31st March, 20X2 the fair value of plan assets was ₹ 1,50,000 and present value of the defined benefit obligation was ₹ 1,47,920. Actuarial losses on the obligations for the year 20X1- 20X2 were ₹ 600.

On 1st April, 20X1, the company made the following estimates, based on its market studies, understanding and prevailing prices.

	%
Interest & dividend income, after tax payable by the fund	9.25
Realised and unrealised gains on plan assets (after tax)	2.00
Fund administrative costs	(1.00)
Expected Rate of Return	10.25

You are required to find the expected and actual returns on plan assets.

Solution**Computation of Expected and Actual Returns on Plan Assets**

	₹
Return on ₹ 1,00,000 held for 12 months at 10.25%	10,250
Return on ₹ 30,000 (49,000-19,000) held for six months at 5% (equivalent to 10.25% annually, compounded every six months)	1,500
Expected return on plan assets for 20X1-20X2	11,750
Fair value of plan assets as on 31 March, 20X2	1,50,000
Less: Fair value of plan assets as on 1 April, 20X1	1,00,000
Contributions received	49,000
	(1,49,000)
	1,000
Add: Benefits paid	19,000
Actual return on plan assets	20,000

Alternatively, the above question may be solved without giving compound effect to rate of return.

Illustration 8

Rock Star Ltd. discontinues a business segment. Under the agreement with employee's union, the employees of the discontinued segment will earn no further benefit. This is a curtailment without settlement,

because employees will continue to receive benefits for services rendered before discontinuance of the business segment. Curtailment reduces the gross obligation for various reasons including change in actuarial assumptions made before curtailment. If the benefits are determined based on the last pay drawn by employees, the gross obligation reduces after the curtailment because the last pay earlier assumed is no longer valid.

Rock Star Ltd. estimates the share of unamortized service cost that relates to the part of the obligation at ₹ 18 (10% of ₹ 180). Calculate the gain from curtailment and liability after curtailment to be recognised in the balance sheet of Rock Star Ltd. on the basis of given information:

- Immediately before the curtailment, gross obligation is estimated at ₹ 6,000 based on current actuarial assumption.
- The fair value of plan assets on the date is estimated at ₹ 5,100.
- The unamortized past service cost is ₹ 180.
- Curtailment reduces the obligation by ₹ 600, which is 10% of the gross obligation.

Solution

Gain from curtailment is estimated as under:

	₹
Reduction in gross obligation	600
Less: Proportion of unamortised past service cost	(18)
Gain from curtailment	582

The liability to be recognised after curtailment in the balance sheet is estimated as under:

	₹
Reduced gross obligation (90% of ₹ 6,000)	5,400
Less: Fair value of plan assets	(5,100)
	300
Less: Unamortised past service cost (90% of ₹ 180)	(162)
Liability to be recognised in the balance sheet	138

Illustration 9

An employee Roshan has joined a company XYZ Ltd. in the year 20X1. The annual emoluments of Roshan as decided is ₹ 14,90,210. The company also has a policy of giving a lump sum payment of 25% of the last drawn annual salary of the employee for each completed year of service if the employee retires after completing minimum 5 years of service. The salary of the Roshan is expected to grow @ 10% per annum.

The company has inducted Roshan in the beginning of the year and it is expected that he will complete the minimum five year term before retiring. Thus he will get 5 yearly increment.

What is the amount the company should charge in its Profit and Loss account every year as cost for the Defined Benefit obligation? Also calculate the current service cost and the interest cost to be charged per year assuming a discount rate of 8%.

(P.V factor for 8% - 0.735, 0.794, 0.857, 0.926, 1)

Solution

Calculation of Defined Benefit Obligation (DBO)

$$\begin{aligned}\text{Expected last drawn salary} &= ₹ 14,90,210 \times 110\% \times 110\% \times 110\% \times 110\% \times 110\% \\ &= ₹ 24,00,000\end{aligned}$$

$$\text{Defined Benefit Obligation (DBO)} = ₹ 24,00,000 \times 25\% \times 5 = ₹ 30,00,000$$

Amount of ₹ 6,00,000 will be charged to Profit and Loss Account of the company every year as cost for Defined Benefit Obligation.

Calculation of Current Service Cost

Year	Equal apportioned amount of DBO [i.e. ₹ 30,00,000/5 years]	Discounting @ 8% PV factor	Current service cost (Present Value)
a	b	c	d = b x c
1	6,00,000	.735 (4 Years)	4,41,000
2	6,00,000	0.794 (3 Years)	4,76,400
3	6,00,000	0.857 (2 Years)	5,14,200
4	6,00,000	0.926 (1 Year)	5,55,600
5	6,00,000	1 (0 Year)	6,00,000

Calculation of Interest Cost to be charged per year

Year	Opening balance	Interest cost	Current service cost	Closing balance
a	b	c = b x 8%	d	e = b + c + d
1	0	0	4,41,000	4,41,000
2	4,41,000	35,280	4,76,400	9,52,680
3	9,52,680	76,214	5,14,200	15,43,094
4	15,43,094	1,23,447	5,55,600	22,22,141
5	22,22,141	1,77,859*	6,00,000	30,00,000

*Due to approximations used in calculation, this figure is adjusted accordingly.

Illustration 10

What are the types of Employees benefits and what is the objective of Introduction of this Standard i.e. AS 15?

Solution:

There are four types of employee benefits according to AS 15 (Revised 2005). They are:

- short-term employee benefits, such as wages, salaries and social security contributions (e.g., contribution to an insurance company by an employer to pay for medical care of its employees), paid annual leave, profit-sharing and bonuses (if payable within twelve months of the end of the period) and non-monetary benefits (such as medical care, housing, cars and free or subsidised goods or services) for current employees;
- post-employment benefits such as gratuity, pension, other retirement benefits, post-employment life insurance and post-employment medical care;
- other long-term employee benefits, including long-service leave or sabbatical leave, jubilee or other long-service benefits, long-term disability benefits and, if they are not payable wholly within twelve months after the end of the period, profit-sharing, bonuses and deferred compensation; and
- termination benefits.

Because each category identified in (a) to (d) above has different characteristics, this Statement establishes separate requirements for each category.

The objective of AS 15 is to prescribe the accounting and disclosure for employee benefits. The statement requires an enterprise to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when the enterprise consumes the economic benefit arising from service provided by an employee in exchange for employee benefits.

The fair value of plan assets of Anupam Ltd. was ₹ 2,00,000 in respect of employee benefit pension plan as on 1st April, 20X1. On 30th September, 20X1 the plan paid out benefits of ₹ 25,000 and received inward contributions of ₹ 55,000. On 31st March, 20X2 the fair value of plan assets was ₹ 3,00,000.

On 1st April, 20X1 the company made the following estimates, based on its market studies and prevailing prices.

	%
Interest and dividend income (after tax) payable by fund	10.25
Realized gains on plan assets (after tax)	3.00
Fund administrative costs	(3.00)
Expected rate of return	10.25

Calculate the expected and actual returns on plan assets as on 31st March, 20X2, as per AS 15.

Solution:

Computation of Expected Returns on Plan Assets as on 31st March, 20X2, as per AS 15

	₹
Return on opening value of plan assets of ₹ 2,00,000 (held for the year) @ 10.25%	20,500
Add: Return on net gain of ₹ 30,000 (i.e. ₹ 55,000 – ₹ 25,000) during the year i.e. held for six months @ 5% (equivalent to 10.25% annually, compounded every six months)	1,500
Expected return on plan assets as on 31st March, 20X2	22,000

Computation of Actual Returns on Plan Assets as on 31st March, 20X2, as per AS 15

	₹	₹
Fair value of Plan Assets as on 31st March, 20X2		3,00,000
Less: Fair value of Plan Assets as on 1st April, 20X1	(2,00,000)	
Add: Contribution received as on 30th September, 20X1	55,000	(2,55,000)
		45,000
Add: Benefits paid as on 30th September, 20X1		25,000
Actual returns on Plan Assets as on 31st March, 20X2		70,000

MTP / RTP / Past Exam**Question 1 (RTP Nov 20)**

Luv limited is a private Limited company. As per HR policy of Luv Limited, Grade F employees are eligible for sabbatical leave (Long term compensated absences as per AS 15). Till previous year, there were 15 employees who are eligible for Sabbatical leave and company had duly recorded the liability for long term compensated absences based on the actuarial valuation for eligible employees. During the current period out of total 15 employees, 13 employees have left the organization and only 2 employees are continuing in LUV Limited. Due to budget constraint, CFO has denied to involve actuary and told finance manager to determine the liability based on the recent actuarial report available with them. Finance manager ensured the following:

- There is no material change in interest rate
- There is no change in fair value of plan assets.

Based on that, Finance manager have manually computed an amount of Rs. 5,00,000 (considering last year actuarial report as base) towards long term compensation liability without involving Actuary during the period ended 31.03.2020. Is this treatment is in line with AS 15?

Solution:

As per para 58 of the AS 15, the detailed actuarial valuation of the present value of defined benefit obligations may be made at intervals not exceeding three years. However, with a view that the amounts recognized in the financial statements do not differ materially from the amounts that would be determined at the balance sheet date, the most recent valuation is reviewed at the balance sheet date and updated to reflect any material transactions and other material changes in circumstances (including changes in interest rates) between the date of valuation and the balance sheet date. The fair value of any plan assets is determined at each balance sheet.

Since AS-15 (Para 58) states that actuarial valuation needs to be done at least once in three years. Since management had done the actuarial valuation in Previous Year, they can go ahead with exemption for this year subject to evaluation and conclusion by management as at balance sheet date that there are no significant changes in the amount of liability compared to previous year. Hence working done by the finance manager is appropriate. It is in line with AS 15, since company had recently done the actuarial valuation in previous year and there is no material changes in the external environment.

MCQs

1. Gratuity and Pension would be examples of:
 - (a) Short-term employee benefits
 - (b) Long-term employee benefits
 - (c) Post-employment benefits.
 - (d) None of the above.

2. Non-accumulating compensating absence is commonly referred to as:
 - (a) Earned Leave
 - (b) Sick Leave
 - (c) Casual leave
 - (d) All of the above

3. The plans that are established by legislation to cover all enterprises and are operated by Governments include:
 - (a) Multi-Employer plans
 - (b) State plans
 - (c) Insured Benefits
 - (d) Employee benefit plan

4. Best estimates of the variable to determine the eventual cost of postemployment benefits is referred to as:
 - (a) Employer's contribution
 - (b) Actuarial assumptions
 - (c) Cost to Company
 - (d) Employee's contribution

5. Actuarial gains / losses should be:
 - (a) Recognised through reserves
 - (b) Charged over the expected life of employees
 - (c) Charged immediately to Profit and Loss Statement
 - (d) Do not charged to Profit and Loss Statement

Answers - MCQs

1. (c) 2. (c) 3. (b) 4. (b) 5. (c)
