

ACCOUNTS FROM INCOMPLETE RECORDS

"You don't have to be Great to Start, but you have to Start to be Great."

MEANING OF SINGLE-ENTRY

The term "Single Entry System" is popularly used to describe the problems of accounts from incomplete records.

Very often the small sole proprietorship and partnership businesses do not maintain double entry book keeping system. Sometimes they keep record only of the cash transactions and credit transactions. Sometimes they maintain no record of many transactions. But at the end of accounting period they want to know the performance and financial position of their businesses. This creates some special problems to the accountants.

FEATURES

- | |
|--|
| ➤ It is an inaccurate, unscientific and unsystematic method of recording business transactions. |
| ➤ There is generally no record of real and personal accounts and, in most of the cases; a record is kept for cash transactions and personal accounts. |
| ➤ Cash book mixes up business and personal transactions of the owners. |
| ➤ There is no uniformity in maintaining the records and the system may differ from firm to firm depending on the requirements and convenience of each firm. |
| ➤ Profit under this system is only an estimate and therefore true and correct profits cannot be determined. The same is the case with the financial position in the absence of a proper balance sheet. |

TYPES

Pure single entry	In this, only personal accounts are maintained with the result that no information is available in respect of cash and bank balances, sales and purchases, etc.. In view of its failure to provide even the basic information regarding cash etc., this method exists only on paper and has no practical application.
Simple single entry	In this, only: (a) personal accounts, and (b) cash book are maintained. Although these accounts are kept on the basis of double entry system, postings from cash book are made only to personal accounts and no

	other account is to be found in the ledger. Cash received from debtors or cash paid to creditors is simply noted on the bills issued or received as the case may be.
Quasi single entry	In this: (a) personal accounts, (b) cash book, and (c) some subsidiary books are maintained. The main subsidiary books kept under this system are Sales book, Purchases book and Bills book. No separate record is maintained for discounts which are entered into the personal accounts. In addition, some scattered information is also available in respect of few important items of expenses like wages, rent, rates, etc. In fact, this is the method which is generally adopted as a substitute for double entry system.

Difference between Statement of Affairs and Balance Sheet

Basis	Statement of Affairs	Balance Sheet
Source	It is prepared on the basis of transactions partly recorded under the double entry bookkeeping and partly under the single entry. Most of the assets are recorded based on the estimates, assumptions, information gathered from memory rather from the records.	It is based on transactions recorded strictly on the basis of double entry bookkeeping; each item in the balance sheet can be verified from the relevant subsidiary books, ledger and documentary evidences.
Capital	In this statement, capital is merely a balancing figure being excess of assets over liabilities. Hence assets need not be equal to liabilities.	Capital is derived from the capital account in the ledger and therefore the total of assets side will always be equal to the total of liabilities side.
Omission	Since this statement is prepared from incomplete records, it is very difficult, to identify and record those assets and liabilities, if omitted from the books.	There is no possibility of omission of any item of asset and liability since all items are properly recorded. Moreover, it is easy to locate the missing items since the balance sheet will not agree.
Basis of Valuation	The valuation of assets is generally done in an arbitrary manner; therefore, no method of valuation is disclosed	The valuation of assets is done on scientific basis, fixed assets are shown at the original costs less depreciation till date. Any change in the method of valuation is properly disclosed.
Objective	The objective of preparing this statement is to identify the capital figures in the beginning and at the end of the accounting period respectively.	The objective of preparing the balance sheet is to ascertain the financial position on a particular date.
