Que. 121 **Directions: Read the passage given below and answer the questions that follow by choosing the correct/most appropriate options:**

China recorded its highest temperatures and one of its lowest levels of rainfall in 61 years during a two-month summer heatwave that caused forest fires, damaged crops, and hit power supplies, the national meteorological agency said. The average national temperature in August, 22.4C, was 1.2C higher than the

seasonal norm, while average rainfall fell 23% to 82mm, the third lowest since records began in 1961, according to Xiao Chan, the vice-director of China's national meteorological administration. He told reporters that 267 weather stations across China recorded their highest temperatures in history last month.

The heatwave between mid-June to the end of August was the "most severe" since records began in terms of duration, extent, intensity, and impact, said Xiao.

The extreme temperature caused widespread drought in regions along the Yangtze River, southwestern China, and east and central Tibet. The **persistent** heat and drought caused forest fires and affected agricultural production, water resources, and power supply, Xiao said. The Yangtze is the world's third largest river, providing drinking water to more than 400 million Chinese people, and is the most **vital** waterway to China's economy.

Meanwhile, severe rainstorms hit various regions, including northern and southern China. Lightning, strong winds, and hail hit 13 provinces and regions, including Inner Mongolia and Yunnan, in August. The agency said it issued 65,000 weather alerts, mostly for extreme heat, in August – 26% up from the same month last year. Officials told a press briefing they expected above-average temperatures to continue throughout September, and warned that fire prevention and strategic agricultural plans must be made to cope with the situation.

The meteorological administration last month deployed 75 flights of cloud-seeding drones to induce artificial rain over 1.45m sq km in southern China to **alleviate** the drought. China has warned that extreme weather will probably persist in coming years as it tries to cope with the climate crisis and rising temperatures.

The record-breaking drought has caused some rivers in China – including parts of the Yangtze – to dry up, affecting hydropower, halting shipping, and forcing major companies to suspend operations. The loss of water flow to China's extensive hydropower system has sparked a "grave situation" in Sichuan, which gets more than 80% of its energy from hydropower. Last month, the southwestern province of Sichuan said it would ration power supplies to homes, offices, and shopping malls, after having already ordered producers of energy-intensive metals and fertilizer to curb operations.

Who is the deputy director of China's national meteorological administration?

1. Dr Wenjian Zhang.
2. Mr. Xiao Chan.
3. Dr. Yu Xinwen.
4. Mr. Zhang Zuqiang.
5. Dr. Wang Jingsong.

Que. 135 Directions: In the following passage, some words have been left out and a word has been emboldened beside each blank. Read the passage carefully and select the correct answer for the given blank out of the given alternatives.

Counting the dead is a **A (intimidating)** task, especially in India. The country accounts for roughly 17% of the deaths worldwide, but still doesn't have a system that can **B (meticulously)** count the number of deaths. While the Civil Registration System (CRS) and the Sample Registration System (SRS) measure mortality, both come with their own **C (frailty)**. The CRS is a record of vital events such as birth, death and stillbirth at the place of occurrence. But not all deaths are registered in India and a **D (pronounced)** number is recorded beyond the prescribed time limit of 21 days. The SRS is a large-scale survey that provides an estimate of the death rate or the number of deaths per 1,000 population. While the SRS is considered far more **E (steadfast)**, reports state that in several States, the registered deaths exceed the estimates provided by the SRS. The release of the SRS Statistical Report 2020 in September has yet again raised questions about India's mortality estimates. The report states that the death rate was 6.0 per 1,000 in 2020. In a year affected by the pandemic, the estimated death rate remained unchanged from 6.0 in 2019.

Que. 140 **Directions:** Read the passage given below and answer the questions that follow by choosing the correct/most appropriate options:

One of the great controversies surrounding the Last Supper is whether or not it was a Passover meal. John seems to suggest that the meal was eaten the day before Passover, which has led some scholars to date the Last Supper to the 13th of Nisan (a month on the Jewish calendar), while others say that the crucifixion itself was on the 13th of Nisan.

According to historian Vincent Foster Hopper, one of the people who really pushed 13 as being unlucky was 16th-century numerologist Petrus Bungus. Among his reasons? Hopper says that Bungus "records that the Jews murmured 13 times against God in the exodus from Egypt, that the thirteenth psalm concerns wickedness and corruption, that the circumcision of Israel occurred in the thirteenth year."

The Knights Templar, who were widely believed to be protecting the Holy Grail (the cup Jesus drank from at the Last Supper) as well as other holy objects, also acted as a bank of sorts to European kings. But after French King Philip IV lost a war with England and became heavily indebted to the Knights, he conspired with Pope Clement V to have all members of the Knights Templar arrested, charged with Satanism and other crimes, and massacred. The roundup of the Knights Templar began in earnest on Friday, October 13, 1307.

There's an old superstition that says if you have 13 letters in your name, you're bound to be **cursed**. Silly, yes, but slightly more **convincing** when you consider that a number of notorious murderers' names (Charles Manson, Jack the Ripper, Jeffrey Dahmer, Theodore Bundy, and Albert De Salvo) all contain 13 letters. And, in case you were wondering: Adolf Hitler's baptismal name was Adolf Hitler. Friday the 13th is an expensive day for businesses. One analyst claims that around a billion dollars a year are lost as people choose not to do

business of any kind on Friday the 13th. In some schools of numerology, the number 12 is considered to be the representation of perfection and completion. It stands to reason, then, that trying to improve upon perfection by adding a digit is a very bad idea indeed—your greed will be rewarded with bad luck. The ancient Persians divided history into four chunks of 3000 years. And although the exact timeframes can vary, some scholars feel that at the beginning of the 13,000th year there will be **chaos** as evil mounts a great battle against good (although good will eventually triumph).

Dan Marino is a constant fixture at or near the top of any "best quarterbacks to never win a Super Bowl" list. Perhaps his failure to grab the biggest prize in football comes down to his jersey number—13. And he's not the only example: Basketball star Steve Nash was a two-time NBA MVP and is considered one of the all-time great point guards, but he and his #13 jersey never won a championship. And keeping with sports, 1979's Super Bowl XIII was a particularly bad one for bookies. Called "Black Sunday," it pitted the Dallas Cowboys, the defending champions, against the Pittsburgh Steelers. But as the money kept pouring in from Texas and Pennsylvania, the spread kept changing until settling precisely at the game's actual spread. The losses were legendary.

According to the passage, **which sports was a particularly bad one for bookies?**

1. Football.
2. Super Bowl.
3. Basketball.
4. Cricket.
5. Golf.

Correct Option - 2

Que. 158 Directions: Read the passage given below and select the inference(s) that hold true based on the facts in the passage.

Passage:

The Paris Agreement often referred to as the Paris Accords or the Paris Climate Accords, is an international treaty on climate change, adopted in 2015. It covers climate change mitigation, adaptation, and finance. The

Agreement was negotiated by 196 parties at the 2015 United Nations Climate Change Conference near Paris, France. The Paris Agreement was opened for signature on 22 April 2016 (Earth Day) at a ceremony in New York. After the European Union ratified the agreement, sufficient countries had ratified the Agreement responsible for enough of the world's greenhouse gases for the Agreement to enter into force on 4 November 2016. As of September 2022, 194 members of the United Nations Framework Convention on Climate Change (UNFCCC) are parties to the agreement. Of the four UNFCCC member states which have not ratified the agreement, the only major emitter is Iran. The United States withdrew from the Agreement in 2020 but rejoined in 2021.

Inferences:

I: The Paris Agreement is not enough to prevent the global average temperature from rising 1.5°C.

II: The Paris Agreement is a legally binding international treaty on climate change.

III: The Eiffel Tower is a wrought iron lattice tower on the Champ de Mars in Paris.

Que. 159 **Directions:** Read the passage given below and select the inference(s) that hold true based on the facts in the passage.

Passage:

Isaac van Schinne was baptized on 12 February 1640 in Middelburg. He married in that city on 12 October 1667 to Catharina Dammaert (1646–1683). His son Isaac was born in Veere. In 1676 he arrived in Deshima; after a year he left, but in 1679 he went again. In 1681 he was appointed as chief of the factory. After one year he had to leave. After his wife died he remarried the widow Aletta de Bitter (1654–1708). Early in 1684 they left Batavia and arrived in Middelburg later that year. Van Schinne was buried there on 18 September 1686; after a few years, his widow and their daughter moved to Utrecht.

Que. 160 **Directions:** Read the passage given below and select the inference(s) that hold true based on the facts in the passage.

Passage:

Federer started his season in the Brisbane International as the defending champion, despite having a virus when the tournament started. However, in a rematch of the previous year's final, he lost in the final to Milos Raonic in straight sets. Federer then participated in the 2016 Australian Open and rebounded from his third-round defeat by Andreas Seppi in 2015 by reaching the semifinals but lost to eventual champion Novak Djokovic in four sets. The day after his loss to Djokovic, Federer sustained a knee injury and in early February, he underwent arthroscopic surgery to repair a torn meniscus in his knee and missed the tournaments in Rotterdam, Dubai, and Indian Wells in February and March. He was scheduled to return to

action in Miami. Due to a stomach virus, he had to withdraw from the Miami Open thus prolonging his time on the sidelines.

Inferences:

I: Arthroscopic surgery is a procedure to repair a torn meniscus in the knee.

II: Federer had to withdraw from the Miami Open due to the coronavirus.

III: Federer started his season in the Brisbane International against Novak Djokovic.

Que. 161 निर्देश : निम्नलिखित गद्यांश को पढ़कर पूछे गए प्रश्नों के सर्वाधिक उचित उत्तर वाले विकल्प का चयन कीजिए।

मानव गतिविधियाँ अब वायुमण्डल के लिये खतरा बन रही हैं। मानव द्वारा निर्मित ग्रीन गैसों जिन्हें क्लोरो फ्लोरो कार्बन (सी. एफ. सी.) कहते हैं वायुमण्डल में ग्रीन हाउस का कार्य करके उसका तापमान बढ़ा रही हैं। सी. एफ.सी. धरती का तापक्रम बढ़ाने में दो तरह से सहयोग देती है। एक तो सी. एफ. सी. ग्रीन गैसों हैं, जो कार्बन डाइऑक्साइड की तरह तापक्रम को सोखती हैं। इससे तापमान बढ़ेगा और मौसम में परिवर्तन होगा। सी. एफ. सी. और सी. एफ. सी. 2 का प्रत्येक अणु कार्बन डाइऑक्साइड की तुलना में ताप को 10,000 गुना अधिक सोख सकती हैं। वायु मंडल में 10 से 15 प्रतिशत बढ़ी गर्मी इन्हीं रसायनों के कारण है। सी. एफ. सी. द्वारा तापक्रम बढ़ने का दूसरा कारण इनके द्वारा ओजोन परत का नष्ट होना है। वायुमंडल की गर्मी का पुनः वितरण उच्च ताप से निम्न ताप की ओर होने लगता है जिससे स्ट्रेटोस्फियर ठंडा हो जाता है। ऐसा होना बादलों के लिये अनुकूल परिस्थितियाँ पैदा करता है जो ओजोन के नाश में सहायक होते हैं। पर बढ़ते यातायात के साधन, जंगलों का जलाना, कोयले का जलना, भूतल से पेड़ों का कटना आदि कारणों से में कार्बन डाइऑक्साइड की मात्रा बढ़ती जा रही है।

गद्यांश के आधार पर स्ट्रेटोस्फियर ठंडा क्यों होता है?

1. वायुमण्डल का घनत्व ऊंचाई के साथ-साथ घटता जाता है।
2. वायुमण्डल में जलवाष्प एवं गैसों के अतिरिक्त सूक्ष्म ठोस कण भी उपस्थित हैं।
3. वायुमंडल की गर्मी का पुनः वितरण उच्च ताप से निम्न ताप की ओर होने से होता है।
4. वायुमण्डल में ओजोन परत की पृथ्वी और उस पर रहने वाले जीवों के लिए बड़ी ही महत्वपूर्ण भूमिका है।
5. वायुमण्डल में ग्लोबल वार्मिंग हिम ग्लेशियरों को तेजी से पिघला रहा है।

Correct Option - 3

Que. 162 गद्यांश के आधार पर कार्बन डाइऑक्साइड की मात्रा किसके कारण नहीं बढ़ती है?

1. जंगलों का बढ़ती आबादी के कारण जलाने से
2. यातायात के साधनों का अत्यधिक दोहन से
3. कोयले के जलने से निकलने वाले गैस से
4. भूतल से पेड़ों को अंधाधुंध काटने से
5. जीवाश्म ईंधन का उपयोग न करने से

Correct Option - 5

Que. 163 गद्यांश के आधार पर क्लोरो फ्लोरो कार्बन किस प्रकार का कार्य कर रही है?

1. क्षोभमंडल में मानव द्वारा प्राकृतिक संसाधनों का उपयोग किया जाता है।

2. यह वायुमण्डल में ग्रीन हाउस का कार्य करके उसका तापमान बढ़ा रही हैं।
3. ये क्लोरिन, फ्लोरिन एवं कार्बन से मिलकर बने होते हैं।
4. यह समतापमंडल में पराबैंगनी विकिरण द्वारा ये नष्ट हो जाते हैं।
5. इनका प्रयोग रेफ्रिजरेटर एवं आग बुझाने वाले कारकों के रूप में किया जाता है।

Correct Option - 2

Que. 164 वायुमंडल की गर्मी का पुनः वितरण उच्च ताप से निम्न ताप की ओर होने लगता है ऐसा होना -

1. यह धरती के साथ-साथ इंसानों के लिए भी बेहद हानिकारक है।
2. ताप निचली सतह में ही रहता है इसलिए गर्मी का अनुभव होता है।
3. यह बादलों एवं मौसम संबंधी घटनाओं से लगभग मुक्त होती है।
4. बादलों के लिये अनुकूल परिस्थितियाँ पैदा करता है जो ओजोन के नाश में सहायक होते हैं।
5. तापमान के साथ-साथ ऊंचाई में भी वृद्धि हो रही है।

Correct Option - 4

Que. 165 बादलों के लिये अनुकूल परिस्थितियाँ पैदा करता है। रेखांकित से आशय है -

Que. 196 निर्देश: निम्नलिखित गद्यांश को पढ़कर पूछे गए प्रश्नों के सर्वाधिक उचित उत्तर वाले विकल्प का चयन कीजिए।

यदि हमारा वर्तमान बिगड़ता है तो उसका प्रभाव भावी जीवन पर भी पड़ सकता है। यदि हम हमेशा भविष्य की चिंता करने में ही अपना समय बरबाद करेंगे तो यह भी गलत होगा। भविष्य तो अभी आया नहीं। भविष्य में क्या होगा? कोई नहीं जान सका है और न ही जान सकता है, इसलिए भविष्य की चिंता करने में कोई लाभ नहीं होगा। भविष्य कि चिंता में अपने वर्तमान की शांति नष्ट मत करो। संसार में जो भी व्यक्ति महान् बने हैं, उन्होंने वर्तमान में ही जीना सीखा था। वर्तमान व्यक्ति की मुट्ठी में है, वह चाहे तो उसका सदुपयोग कर जीवन की ऊँचाई को छू ले या अपनी बरबादी का मूकदर्शक बना रहे। वर्तमान को स्वीकार कर ही हम श्रेष्ठता को प्राप्त कर सकता है। प्रत्येक व्यक्ति सुख और शांति का जीवन जीने की कामना करता है और यह कामना स्वाभाविक भी है। परंतु सुखी और शांति का जीवन जीना क्या चिंता और मानसिक घुटन के साथ रहने से संभव है? सर्वथा नहीं। मानसिक रूप से चिंतित रहने और बीती बातों पर सोचते रहने से तो जीवन में सुख और शांति का अनुभव करना संभव नहीं। लगातार घुटन का जीवन जीते रहने से व्यक्ति कई रोगों जैसे तनाव, रक्तचाप, मधुमेह आदि का शिकार हो जाएगा। इतना ही नहीं वह पारिवारिक जीवन का सुख और आनंद से भी वंचित रहेगा। स्वास्थ्य भी गिर जाएगा। परिजनों, मित्रों और संबंधियों से भी संबंध खराब हो सकते हैं। तो क्या

करें? चिंता और मन-ही-मन में घुटते रहने के स्वभाव को बदलिए। अपने दृष्टिकोण सोच में परिवर्तन करिए। सकारात्मक सोच को अपनाना चाहिए। कहा भी गया है कि 'चिंता चिंता से बढ़कर है' चिंता तो मुर्दा को जलाती है, परंतु चिंता तो जीवित को जलाती रहती है। कहा गया है कि 'गतं न शोचन्ति पण्डिता', अर्थात् विद्वान् बीती बातों पर शोक-चिंता नहीं करते।

गद्यांश के आधार पर वर्तमान व्यक्ति की मुट्टी में है वह चाहे तो -

1. अप्रिय परिस्थिति उत्पन्न होने पर भी प्रसन्नचित्त होने की प्रक्रिया बनाये रखा जाता है।
2. विरोध को विरोध के रूप में न लेकर उसे प्रेरणा के रूप में स्वीकार करना होता है।
3. अपनी भूल के लिए क्षमा माँगना और दूसरों की भूलों को क्षमा करना भी आवश्यक होता है।
4. किसी बात को याद करते रहना, घुटन अनुभव करते रहना बिल्कुल भी अच्छा नहीं है।
5. उसका सदुपयोग कर जीवन की ऊँचाई को छू ले या अपनी बरबादी का मूकदर्शक बना रहे।

Correct Option - 5

Que. 197 गद्यांश के आधार पर जीवन में सुख और शांति का अनुभव करना क्यों संभव नहीं है?

1. क्षमा करने वाले के प्रति हमेशा कृतज्ञ और श्रद्धाशील रहने से
2. नकारात्मक चिंतन एवं स्मृतियों से तनाव को निरंतर बढ़ते रहने से
3. भीषण घटनाओं के साथ जीने के लिए विवश होने के साथ से
4. मानसिक रूप से चिंतित रहने और बीती बातों पर सोचते रहने से
5. भविष्य कि चिंता में अपने वर्तमान की शांति को नष्ट करने से

Correct Option - 4

Que. 198 गद्यांश के आधार पर लगातार घुटन का जीवन जीते रहने से क्या होगा?

1. व्यक्ति को अप्रिय, दुःख, कटु एवं ठेस पहुँचाने वाली बातों को भूल जाना ही हितकर होगा।
2. व्यक्ति किसी घटना को लगातार और लंबे समय तक याद करता रहेगा।
3. व्यक्ति कई रोगों जैसे तनाव, रक्तचाप, मधुमेह आदि का शिकार हो जाएगा।
4. व्यक्ति को अतीत की कड़वाहट से बचने के लिए वर्तमान में जीने का अभ्यास डालना होगा।
5. व्यक्ति को स्वस्थ और सुखी जीवन जीने के लिए वर्तमान को सुधारना ही अच्छा होगा।

Correct Option - 3

Que. 199 गद्यांश के आधार पर सकारात्मक सोच को अपनाने के लिए कहा गया क्योंकि -

1. जो वर्तमान को सँभाल लेता है, वह अतीत की भूलों का सुधार करके भविष्य को सुनहला एवं उज्वल बना लेता है।
2. 'चिंता चिंता से बढ़कर है' चिंता तो मुर्दा को जलाती है, परंतु चिंता तो जीवित को जलाती रहती है।
3. अपने मन से उदासीनता, निराशा, क्रोध को छोड़कर वर्तमान में प्रसन्न रहने का उपाय करना है।
4. मानसिक रूप से अशांति का प्रभाव हमारे वर्तमान जीवन पर भी बुरा पड़ सकता है।
5. शरीर से, मन से और आचरण से स्वस्थ होना तथा अस्वस्थता की सारी बातें भूल जाना है।

Area of a rhombus is 240 cm^2 and one of the diagonals of the rhombus is 24 cm.

Quantity I : If the area of a rectangle is 20 cm^2 more than the area of the rhombus and the length of the rectangle is equal to one of the diagonals of the rhombus, then find the breadth of the rectangle.

Quantity II : Find the side of the rhombus

1. Quantity I > Quantity II
2. Quantity I < Quantity II
3. Quantity I \geq Quantity II
4. Quantity I \leq Quantity II
5. Quantity I = Quantity II \Rightarrow

Correct Option - 2

Que. 236 In the question, two quantities I and II are given. You have to solve both the quantities and establish the correct relation between Quantity - I and Quantity - II and choose the correct option accordingly.

'M', 'N', and 'P' are three two-digit natural numbers where the unit digit of each number is 'odd' and the ten's digit is 'even'. 'M' is the largest possible number and 'P' is the smallest possible number.

Quantity I : If all the numbers are divided by '2', then find the sum of remainders.

Quantity II : If the average of 'M', 'N', and 'P' is 51, then find the sum of digits of 'N'.

1. Quantity I > Quantity II
2. Quantity I < Quantity II
3. Quantity I \geq Quantity II
4. Quantity I \leq Quantity II
5. Quantity I = Quantity II

Correct Option - 2

Que. 237 The question consists of two statements numbered "I" and "II" given below it. You have to decide whether the data provided in the statements are sufficient to answer the question or not and choose the correct option accordingly.

'A', 'B' and 'C' started a partnership with Rs. $(x - 500)$, Rs. $(x + 100)$ and Rs. $(x + 700)$ respectively. Find the value of 'x', if the investment time is equal for all three partners.

Statment (I) : The ratio between the amount invested by 'A' and 'C' was 5 : 9.

Statment (II) : If the total profit was 80% more than the value of 'x' then the profit share of 'C' was Rs. $(x - 1400)$.

1. The data in statement I alone is sufficient to answer, while the data in statement II alone is not sufficient to answer the question.
2. The data in statement II alone is sufficient to answer, while the data in statement I alone is not sufficient to answer the question.
3. The data either in statement I alone or in statement II alone are sufficient to answer the question.
4. The data given in both statements I and II together are not sufficient to answer the question.
5. The data in both statements I and II together are necessary to answer the question.

Correct Option - 3

Que. 238 The question consists of two statements numbered "I" and "II" given below it. You have to decide whether the data provided in the statements are sufficient to answer the question or not and choose the correct option accordingly.

The ratio of the cost prices of articles 'A', 'B' and 'C' is 8 : 5 : 3. The percentage by which article 'A', article 'B' and article 'C' are marked up is 80%, 60%, and 40% respectively. Find the cost price of article 'C' ?

Statement (I) : The ratio of the selling prices of article 'A', article 'B', and article 'C' is 10 : 7 : 13.

Statement (II) : Total profit earned on the three articles is Rs. 120 less than the total discount given on the three articles together.

1. The data in statement I alone is sufficient to answer, while the data in statement II alone is not sufficient to answer the question.
2. The data in statement II alone is sufficient to answer, while the data in statement I alone is not sufficient to answer the question.
3. The data either in statement I alone or in statement II alone are sufficient to answer the question.
4. The data given in both statements I and II together are not sufficient to answer the question.
5. The data in both statements I and II together are necessary to answer the question.

Correct Option - 4

Que. 239 The question consists of two statements numbered “I” and “II” given below it. You have to decide whether the data provided in the statements are sufficient to answer the question or not and choose the correct option accordingly.

A path of 'x' meter width is carved around a rectangular field. If the length of the rectangular field is 3m more than the breadth of the field, then find the value of 'x'?

Statement (I) : There is a 'square' whose side is 2m more than the breadth of the rectangular field and the area of the square is 50 m^2 more than the area of the rectangular field.

Statement (II) : Total cost of construction of a path around the rectangular field is Rs. 1920 and the rate of the construction of the path is Rs.40/ m^2 .

1. The data in statement I alone is sufficient to answer, while the data in statement II alone is not sufficient to answer the question.
2. The data in statement II alone is sufficient to answer, while the data in statement I alone is not sufficient to answer the question.
3. The data either in statement I alone or in statement II alone are sufficient to answer the question.
4. The data given in both statements I and II together are not sufficient to answer the question.
5. The data in both statements I and II together are necessary to answer the question.

Correct Option - 5

Que. 240 A boat has speed a of 15 m/s in still water, but while going upstream its speed is half the speed as compared to the speed of the boat going downstream. The boat is going downstream and a ship while going downstream crosses the boat in 15 seconds. The length of the ship is double the length of the boat. Find the time the ship will take to cover a distance of 144 kilometers while going upstream if the length of the ship is 100 meters.

1. 1 hour
2. 2 hours
3. 1.33 hours
4. 1.6 hours
5. 3 hours

Correct Option - 2
